It's Being Done in Social Studies Lara Willox, Cathy A. R. Pattnaik, 2012-12-30 This vital addition to Springer s Educating the Young Child series addresses gaps in the literature on father involvement in the lives of young children a topic with a fast rising profile in today s world of female breadwinners and single parent households While the significant body of theoretical understanding and empirical data accumulated in recent decades has done much to characterize the fluidity of evolving notions of fatherhood the impact of this understanding on policy and legal frameworks has been uneven at an international level In a field where groups of fathers were until recently

marginalized in research this book adopts a refreshingly inclusive attitude aiming to motivate researchers to capture the nuanced practices of fathers in minority groups such as those who are homeless gay imprisoned raising a disabled child or from ethnically distinct backgrounds including Mexican and African American and indigenous fathers The volume includes chapters highlighting the unique challenges and possibilities of father involvement in their children s early years of development Contributing authors have integrated theories research policies and programs on father involvement so as to attract readers with diverse interest and expertise and material from selected countries in Asia Australia and Africa as well as North America evinces the international scope of their analysis Their often interdisciplinary analyses draw too on historical and cultural legacies even as they project a vision of the future in which fathers involvement in their young children s lives develops alongside the changing political economic and educational landscapes around the world **Teaching**

State Board of Education,1904 Data Book of Social Studies Materials and Resources ,1980 Educating Hearts and Minds Catherine C. Lewis,1995-01-27 How do children become eager motivated learners and caring responsible citizens Educating Hearts and Minds first published in 1995 is a portrait of Japanese preschool and early elementary education which examines these questions Its thesis which will surprise many Americans is that Japanese schools are successful because they meet children s needs for friendship belonging and contribution This book brings to life what actually happens inside Japanese classrooms What do children learn How do they learn What values are emphasised and how are they taught In a sharp departure from most previous accounts this book suggests that Japanese education succeeds because all children not just the brightest or best behaved somehow come to feel

like valued members of the school community Ironically Japanese teachers credit John Dewey and other progressive Western educators for many of the techniques that make Japanese schools both caring and challenging This book brings to a wider readership the voices of Japanese classroom teachers voices that are at once deeply consonant with Western aspirations and deeply provocative
