Ellison II, 2017-11-10 Drawing on all the community's collective voices from doctors to drug dealers Fearless Dialogues is a groundbreaking program that seeks real solutions to problems of chronic unemployment violence and hopelessness In cities around the United States and now the world the program's founder Gregory C Ellison and his team create conversations among community members who have never spoken to one another the goal of which are real implementable and lasting changes to the life of the community These community transformations are based on both face to face encounters and substantive analysis of the problems the community faces In Fearless Dialogues A New Movement for Justice Ellison makes this same kind of analysis available to readers walking them through the steps that must be taken to find common ground in our divided communities and then to implement genuine and lasting change *Creating the Opportunity to Learn* A. Wade Boykin, Pedro Noguera, 2011-09-08 Unless we believe that those who have more are inherently superior to those who have less we should be troubled by the fact that patterns of achievement are often fairly predictable particularly with respect to students race and class In Creating the Opportunity to Learn Wade Boykin and Pedro Noguera help navigate the turbid waters of evidence based methodologies and chart a course toward closing and eliminating the academic achievement gap Turning a critical eye to current and recent research the authors present a comprehensive view of the achievement gap and advocate for strategies that contribute to the success of all children Boykin and Noguera

maintain that it is possible to close the achievement gap by abandoning failed strategies learning from successful schools and simply doing more of what the research shows is most effective Success is founded on equity but equity involves more than simply ensuring students have equal access to education equity also entails a focus on outcomes and results If we want to bring about significant improvements in those outcomes we have to do more to address the context in which learning takes place In short we must create schools where a child s race or class is no longer a predictor for how well he or she might perform
