Nubé, Muriel P.C. Grooteman, Peter J. Blankestijn, 2015-11-10 This book gives a complete description of online hemodiafiltration in five sections It is unique in the systematic and complete way in which hemodiafiltration is described Each chapter is completed by a point to point summary of essential information in a separate text box Part of the book is dedicated to the theoretical background of convective clearance In this part safety issues and quality control is reviewed especially on the quality of water for dialysis and substitution fluid as well as equipment both dialyzers and machines with which this treatment can be performed As recently the results of several randomized controlled trials were available the effect of hemodiafiltration on hard clinical end points mortality and morbidity is discussed in detail This has not been done before as the most recent book journal on hemodiafiltration was published in 2011 before the results of the 3 randomized controlled trials were published Furthermore the methodological quality of the trials is discussed by an expert in order to help the readers in their judgment of the trials Part of the book concentrates on the effect of the treatment on several biomarkers and uremic toxins Several clinically relevant issues is discussed separately such as the prescription of anticoagulation during the treatment drug prescription and clearance for patients treated with

hemodiafiltration and hemodynamic stability Finally a practical guide on how to perform the treatment is provided In this unique section seemingly simple but important details of hemodiafiltration treatment is discussed such as the importance of needle size for blood flow rates the difference between filtration fraction and substitution ratio the different targets that can be set and how to reach them As most literature is mainly focused on theoretical issues this unique feature really will help the field to perform hemodiafiltration and answer practical questions

Short Dialysis Andrea Cambi, 2012-12-06 Vittorio E Andreucci of keeping alive patients in terminal chronic Initially created with the purpose renal failure dialysis has undergone improvements in methodology and its final goal has become complete health rehabilitation and optimization of the quality of life of chronic dialysis patients To achieve this many investigators have attempted to increase dialysis efficiency and at the same time shorten dialysis time Their main concern was obviously patient safety the Latin proverb *primum non nocere* is still valid all over the world Thus when clinical observations of the first patients on regular dialysis therapy suggested an inverse relationship between duration of dialysis sessions and severity of peripheral neuropathy long and frequent dialysis sessions were considered the only way to prevent the catastrophic consequences of nerve damage and underdialysis syndrome It was then in 1971 when dialysis duration was 8 12 hours per session that Vincenzo Cambi started a short dialysis trial i e 4 hours 3 times weekly or 3 hours every second day For the first time dialysis was shortened from 24 36 hours weekly to 10 5 12 hours weekly 1 2 In 1971 I was still at the Parma University Hospital We had both just returned from the United States and Dr Cambi was responsible for the dialysis unit
