1. The **Second International** (1889) was the first international conference of workers' parties. It was held in Paris, France, and was attended by representatives from 17 different countries. The conference was organized by the French socialist leader, Jean Baptiste Serrès, and was held in the city of Paris, France. The conference was a significant event in the history of the labor movement, as it was the first time that workers' parties from different countries had met to discuss their common interests and to coordinate their efforts. The conference resulted in the adoption of a platform of demands for workers' rights, including the eight-hour workday, the right to strike, and the right to form trade unions. The conference also led to the formation of the Second International, which was a permanent organization of workers' parties from different countries. The Second International was active until 1914, when it was dissolved due to the outbreak of World War I.

Abstract—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary, middle-aged men. The subjects were randomly assigned to a control group (CON) and an exercise group (EX). The EX group performed a 10-week training program consisting of three sessions per week of aerobic exercise. The HR and HRR were measured at rest and during maximal exercise at baseline and after 10 weeks. The EX group showed a significant decrease in HR at rest and during maximal exercise, and a significant increase in HRR at rest and during maximal exercise, compared to the CON group. The results suggest that a 10-week training program can improve the cardiovascular fitness of sedentary, middle-aged men.
