Handbook on Spaces of Mental Health and Wellbeing Candice P. Boyd, Louise E. Boyle, Sarah L. Bell, Ebba Högström, Joshua Evans, Alak Paul, Ronan Foley, 2024-11-20 This handbook critically examines spaces of mental health and wellbeing across multiple often intersecting domains from green and blue spaces to lived and embodied spaces creative spaces work and home spaces and institutional and post institutional spaces The Routledge Handbook on Spaces of Mental Health and Wellbeing features 45 chapters from leading international scholars who collectively interrogate the spatial dimensions of mental health and wellbeing from conceptual and experiential viewpoints The ways in which these theoretical

developments prompt a re thinking of mental health and wellbeing as concepts is also discussed before presenting some highlights from the handbook s five main sections 1 green and blue spaces 2 lived and embodied spaces 3 creative spaces 4 work and home spaces and 5 institutional and post institutional spaces The key benefits of this book include a great appreciation of the complex networks and assemblages of mental health and wellbeing the value of a geographical spatial approach to thinking about mental health and the vast array of spaces and places that are implicated in human and posthuman notions of wellbeing This book will be of interest to students and scholars across the social sciences and the humanities as well as researchers and practitioners in the fields of psychology psychiatry social work nursing health geography social and cultural geography anthropology mental health social studies cultural theory and architecture **An**

Introduction to the Geography of Health Helen Hazen, Peter Anthamatten, 2012-05-23 Health issues such as the emergence of infectious diseases the potential influence of global warming on human health and the escalating strain of increasing longevity and chronic conditions on healthcare systems are of growing importance in an increasingly peopled and interconnected world A geographic approach to the study of health offers a critical perspective to these issues considering how changing relationships between people and their environments influence human health An Introduction to the Geography of Health provides an accessible introduction to this rapidly growing field covering theoretical and methodological background The text is divided into three sections which consider distinct approaches and techniques related to health geographies Section one introduces ecological approaches with a focus on how natural and built environments affect human health For instance how have irrigation projects influenced the spread of water borne diseases How can modern healthcare settings such as hospitals affect the spread and evolution of pathogens Section two discusses social aspects of health and healthcare considering health as not merely a biological interaction between a pathogen and human host but as a process that is situated among social factors which ultimately drive who suffers from what and where disease occurs Section three then considers spatial techniques and approaches to exploring health giving special focus to the growing role of cartography and geographic information systems GIS in the study of health This clearly written text contains a range of pedagogical features including a wealth of global case studies discussion questions and suggestions for further reading at the end of each chapter a colour plate section and over eighty diagrams and figures The accompanying website also provides presentations exercises further resources and tables and figures This book is an essential introductory text for undergraduate students studying Geography Health and Social Studies [Agent-Based Models of Geographical Systems](#)

Alison J. Heppenstall, Andrew T. Crooks, Linda M. See, Michael Batty, 2011-11-24 This unique book brings together a comprehensive set of papers on the background theory technical issues and applications of agent based modelling ABM within geographical systems This collection of papers is an invaluable reference point for the experienced agent based modeller as well those new to the area Specific geographical issues such as handling scale and space are dealt with as well

as practical advice from leading experts about designing and creating ABMs handling complexity visualising and validating model outputs With contributions from many of the world s leading research institutions the latest applied research micro and macro applications from around the globe exemplify what can be achieved in geographical context This book is relevant to researchers postgraduate and advanced undergraduate students and professionals in the areas of quantitative geography spatial analysis spatial modelling social simulation modelling and geographical information sciences

Holy Wells of Ireland Celeste Ray,Finbar McCormick,2023-09-19 The storied landscapes of Ireland are dotted with holy wells hallowed springs pools ponds and lakes credited with curative powers and often associated with Catholic and indigenous saints While many of these sites have been recently lost to development others are visited daily for devotions and remain the focus of annual community gatherings Encouraging both their use and protection Holy Wells of Ireland delves into these irreplaceable resources of spiritual archaeological and historical significance Reserves of localized spiritual practices holy wells are also ecosystems in themselves and provide habitats for rare and culturally meaningful flora and fauna The shift toward a post Catholic Ireland has prompted renewed interest in holy wells as popular domains with organic faith traditions Of the roughly 3 000 holy wells documented across Ireland some attract international pilgrims and others are stewarded by a single family Featuring 140 color images this remarkable volume shares the transdisciplinary work of contributors who study these wells through the overlapping lenses of anthropology archaeology art history biomedicine folklore geography history and hydrology Braiding community perspectives with those of scholars across academia Holy Wells of Ireland considers Irish holy wells as a resilient feature of ever evolving Irish Christianity as inspiration to other faith traditions as places of pilgrimage and healing and as threatened biocultural resources

De Gruyter Handbook of Feminist Political Geography Sydney Calkin,Cordelia Freeman,2025-11-17 Feminist Political Geography is a relatively new but rapidly growing area of interest in Geographical scholarship It emerged from feminist engagement with the sub discipline of Political Geography which broadly concerns the intersection of politics power and space and it responds to silences and absences in this sub discipline as well as wider silences in Geography scholarship While early scholarship in Feminist Political Geography concentrated on including women s bodies and lives in scholarship its focus has evolved and expanded over time Today Feminist Political Geography scholarship advances broader goals that do not necessarily entail a research focus on women but push us to think about other lives and bodies that are traditionally absent from analysis It challenges us to reimagine and build just futures Like all feminist analysis this body of scholarship is not content with describing or explaining injustices it advances a normative critique of injustice and overtly commits itself to the project of justice In this book the reader will find chapters authored by leading scholars who interrogate key ideas debates and developments with a particular focus on intersectional ideas Structured into four sections that go from the origins of Feminist Political Geography to its futures this handbook is the definitive state of the art survey of this vibrant sub discipline
