Gojak, 2020-08-21 Help students reveal the math behind the words I don't get what I'm supposed to do This is a common refrain from students when asked to solve word problems Solving problems is about more than computation Students must understand the mathematics of a situation to know what computation will lead to an appropriate solution Many students often pluck numbers from the problem and plug them into an equation using the first operation they can think of or the last one they practiced Students also tend to choose an operation by solely relying on key words that they believe will help them arrive at an answer without careful consideration of what the problem is actually asking of them Mathematize It Going Beyond Key Words to Make Sense of Word Problems Grades 6-8 shares a reasoning approach that helps students dig into the problem to uncover the underlying mathematics deeply consider the problem's context and employ strong operation sense to solve it Through the process of mathematizing the authors
