What We Know About CSCL Jan-Willem Strijbos, Paul A. Kirschner, Rob L. Martens, 2006-04-11 A Dutch policy scientist once said the information and knowledge in the twenty first century has the shelf life of fresh fish and learning in this age

often means learning where and how to find something and how to relate it to a specific situation instead of knowing everything one needs to know On top of this the world has become so highly interconnected that we have come to realise that every decision that we make can have repercussions somewhere else To touch as many bases as possible we need to work with knowledgeable others from different fields multiple agents and take heed of their points of view multiple representations To do this we make increasing use of computers and computer mediated communication If computer supported collaborative learning CSCL is not simply a newly discovered hype in education what is it and why are we writing a book about it Dissecting the phrase into its constituent parts we see that first of all CSCL is about learning and in the twenty first century this usually means constructivist learning

Argumentation and Education Nathalie Muller Mirza, Anne-Nelly Perret-Clermont, 2009-06-19 During the last decade argumentation has attracted growing attention as a means to elicit processes linguistic logical dialogical psychological etc that can sustain or provoke reasoning and learning Constituting an important dimension of daily life and of professional activities argumentation plays a special role in democracies and is at the heart of philosophical reasoning and scientific inquiry Argumentation as such requires specific intellectual and social skills Hence argumentation will have an increasing importance in education both because it is a critical competence that has to be learned and because argumentation can be used to foster learning in philosophy history sciences and in many other domains Argumentation and Education answers these and other questions by providing both theoretical backgrounds in psychology education and theory of argumentation and concrete examples of experiments and results in school contexts in a range of domains It reports on existing innovative practices in education settings at various levels
