HDEV, 5th Edition Spencer Rathus, Rebecca Rogerson, 2023-03-27 The fifth Canadian edition of HDEV focuses on current and relevant research in lifespan psychology using a biopsychosocial framework to engage students. It covers a range of topics including the impact of technology and social media, 2SLGBTQ issues, physician-assisted dying, and changing family dynamics. HDEV is a convenient and easy-to-reference paperback textbook that includes popular Chapter Review Cards that can be easily removed and referenced. Students will find this format helpful for their studying and learning. *HDEV, Second Canadian Edition* Spencer A. Rathus, Shauna Longmuir, 2014-02-15

**Human Development and Faith (Second Edition)** Felicity B. Kelcourse, 2015-07-28 This book now in its second edition brings together the best available understandings of human development from a multidisciplinary perspective. Uniquely inclusive of the moral and faith dimensions of context and life cycle development, *Human Development and Faith* examines the interplay of mind, body, family, community, and soul at every stage of development. It addresses two central questions: What are the good enough conditions of parenting, family, and community in each phase of life from birth to death which support growth and development? What gives life adequate meaning as development proceeds? If human development describes the normative and hoped-for passages of life, then faith provides the necessary component of meaning. Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live. The *Journal of Pastoral Theology* called the first edition of *Human Development and Faith* an excellent text for pastoral theology courses because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development. This second edition includes a new chapter on infancy, updates reflecting our growing awareness of cultural diversity, and a new preface.

**Concepts and Theories of Human Development** Richard M. Lerner, 2013-05-13 A classic in the field, this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human development in departments of psychology and human development. This volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives. Since the publication of the second edition, developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts having either a nature or nurture emphasis. As a consequence, a developmental systems orientation frames the presentation in this edition. This new edition has been expanded substantially in comparison to the second edition. Special features include: A separate chapter focuses on the historical roots of concepts and theories of human development; on philosophical models of development; and on developmental contextualism. Two new chapters surrounding the discussion of developmental contextualism: one on developmental systems theories wherein several exemplars of such models are discussed, and a corresponding chapter wherein key instances of such theories, life span, life course, bioecological, and action-theoretical ones are presented. A new chapter on cognition and development is included, contrasting systems

approaches to cognitive development with neo nativist perspectives A more differentiated treatment of nature oriented theories of development is provided There are separate chapters on behavior genetics the controversy surrounding the study of the heritability of intelligence work on the instinctual theory of Konrad Lorenz and a new chapter on sociobiology A new chapter concentrates on applied developmental science
