If you are installing multiple remote-controlled fans on the same circuit breaker, you may need to perform a few extra steps to prevent interference or faulty operation of your remote controls.

Go to www.hunterfan.com/RACs and click "How do I properly install multiple remote-controlled fans?" for more information.

Installation

Before installing the Universal Remote Control Receiver, use the remote control to turn the fan speed to "off" and the light to "off" before proceeding with installation.

Insert the receiver into the fan's mounting bracket. Be sure to align the receiver's pins with the bracket's slots. After wiring is complete, it may be helpful to rotate the receiver clockwise or counter-clockwise to align the pins with the slots.

Choose the hanging system that most closely resembles the one used by your fan and install the receiver as shown and wire as directed.

Note: Some fans may have a separate power switch for the fan and light. If so, the receiver should be installed in the fan's power switch. The receiver and fan must remain properly grounded.

The receiver should be installed in a location that is easily accessible for maintenance and is protected from moisture.

Wiring

CONNECT WIRE FROM RECEIVER TO FAN: Using the wiring as shown, connect the wires from the receiver to the fan. The fan's power supply wire with white stripes and the fan's ground wire should be connected to the black wire from the fan.

If you're not sure about wire colors or connections, please consult a qualified electrician.

AFTER ALL WIRES ARE CONNECTED and checked with your multimeter, connect the receiver.

CAUTION: Always disconnect power to the fan before working on the fan. The fan's power supply wire with white stripes and the fan's ground wire should be connected to the black wire from the fan. If you're not sure about wire colors or connections, please consult a qualified electrician.
