Recognized by universities throughout the world, the International Baccalaureate (IB) is a college entrance examination that students can take in any country. A school that adopts the IB curriculum ensures that its academics are brought up to international standards. Over 500 U.S. high schools currently participate in the International Baccalaureate program. As the IB concept gains ground with students, parents, and teachers in North America, Supertest tells two illuminating stories: how the IB program came to be and eventually reached the United States, and how it came to be implemented at Mount Vernon High in Alexandria, VA. The book provides insight into how ideas first conceived by a small group of educators in Switzerland eventually helped improve a typical American public school. Avgerinou, Maria D., Gialamas, Stefanos P., 2016-06-20. Blended learning has gained significant attention recently by educational leaders, practitioners, and researchers. iFlex, a variation of blended learning, is based on the premise that certain non-interactive teaching activities such as lecturing can take place by students without teachers' direct involvement. Classroom time can then be used for educational activities that fully exploit teacher-student and student-student interactions, allowing for meaningful personalized feedback and scaffolding on demand. Revolutionizing K-12 Blended Learning through the iFlex Classroom Model presents a well-rounded discussion on the iFlex model, highlighting methods for K-12 course design, delivery, and evaluation, in addition to teacher performance assessment in a blended iFlex environment. Emphasizing new methods for improving the classroom and learning experience, in addition to preparing students for higher education and careers, this publication is an essential reference source for pre-service and in-service teachers, researchers, and administrators.
