Meine, Matthew Stannard, 2021-04-30 The authors of this book are neither watchmakers nor specific watch specialists just dedicated watch collectors A book for the friends of watches and a guide for the collector or the possible collector to be giving some advice and guidelines certainly also expressing very subjective opinions Specific subjects of interest from the multi faceted mosaic of time watches and watchmaking as a whole collecting watches watches and time the quartz crisis the revival of mechanic watches clocking of watches and the corresponding amplitudes from the pendulum to the atomic clock adjustment and regulation of a watch time as a standard unit changing of the time itself technical features magnetism and watches radium contamination watch dials hallmarks the gold rush things to watch out for when collecting watches and more Mechanical watches hand wind mechanical watches automatic electric watches electronic watches quartz controlled electric watches tuning fork watches quartz controlled tuning fork watches quartz watches watches radio controlled by an atomic clock Also including antique and vintage pocket watches Over 300 pictures black and white of original watches tools equipment and others *NAWCC Bulletin* ,1995 *On the Efficient Determination of Most Near Neighbors* Mark S. Manasse, 2022-05-31 The time worn aphorism close only counts in horseshoes and hand grenades is clearly inadequate Close also counts in golf shuffleboard archery darts curling and other games of accuracy in which hitting the precise center of the target isn't to be expected every time or in which we can expect to be driven from the target by skilled opponents This book is not devoted to sports discussions but to efficient algorithms for determining pairs of closely related web pages and a few other situations in which we have found that inexact matching is good enough where proximity suffices We will not however attempt to be comprehensive in the investigation of probabilistic algorithms approximation algorithms or even techniques for organizing the discovery of nearest neighbors We are more concerned with finding nearby neighbors if they are not particularly close by we are not particularly interested In thinking of when approximation is sufficient remember the oft told joke about two campers sitting around after dinner They hear noises coming towards them One of them reaches for a pair of running shoes and starts to don them The second then notes that

even with running shoes they cannot hope to outrun a bear to which the first notes that most likely the bear will be satiated after catching the slower of them We seek problems in which we don t need to be faster than the bear just faster than the others fleeing the bear Engineering ,1906 *Work* ,1900 English Mechanics and the World of Science ,1885
