The Posing of Questions A. Wisniewski, 2013-11-27 This book is a study in the logic of questions sometimes called erotetic logic The central topics in erotetic logic have been the structure of questions and the question answer relationship This book doesn't neglect these problems but much of it is focussed on other issues The main subject is the logical analysis of certain relations between questions and the contexts of their appearance And our aim is to elaborate the conceptual apparatus of the inferential approach to the logic of questions Questions are asked for many reasons and for different purposes Yet before a question is asked or posed a questioner must arrive at it In many cases arriving at a question resembles coming to a conclusion there are some premises involved and some inferential thought processes take place If we agree that a conclusion need not be conclusive we may say that sometimes questions can play the role of conclusions But questions can also perform the role of premises we often pass from some initial question to another question In other words there are inferential thought processes we shall call them erotetic inferences in which questions play the roles of conclusions or conclusions and premises The inferential approach to the logic of questions focusses its attention on the analysis of erotetic inferences This book consists of eight chapters

A Bulk Of Short Questions And Answer Series-2 Dr. Ramen Goswami, 2023-10-24 This book helps the undergraduate students of English honours in India to modify their insight and increase their intellectuality only then my labour will prove fruitful [Handbook of Philosophical Logic](#) Dov M. Gabbay, Franz Guenther, 2012-12-06 The eighth volume of the Second Edition contains major contributions on the Logic of Questions Sequent Systems for Modal Logics Deontic Logic as well as Deontic Logic and Contrary to duties Audience Students and researchers whose work or interests involve philosophical logic and its applications

The Question as a Measure of Efficiency in Instruction Romiett Stevens, 1912 **Scholastic Meditations** Nicholas Rescher, 2005-09 The newest volume in the ongoing Studies in Philosophy and the History of Philosophy series comprises ten essays that mediate between Scholastic concerns and contemporary philosophical issues Distinguished author and philosopher Nicholas Rescher suggests that the Scholastic era the 500 year period from Abelard to Suarez was a model of philosophical activity More than at any other stage of history philosophy stood at the center of academic and intellectual culture And many of the criticisms of

the scholastic thinkers voiced since that time their preoccupation with subtle distinctions and logic chopping for example fail to do justice to the seriousness of their concerns and to the fact that their subtleties generally served a clear purpose with regard to the clarification of significant philosophical issues The studies gathered in this volume seek to do homage to the spirit of Scholasticism They address key issues in that tradition some from an historical point of view others from a more substantive standpoint The essays are written in the conviction that there is much to be learned from the schoolmen even when one fails to agree with their substantive doctrinal positions The methods they employed and their commitment to their projects have much to teach and to inspire us about the proper conduct of philosophizing

Contributions to Education, 1912

Scientists as Writers James Harrison, 2014-05-09 In the endless debate about the Two Cultures no book until this attempted to provide a selection of scientific writing on specific themes to stimulate students of arts subjects into discussion and writing about the nature of science and its relationship with the rest of life This book is based on a selection of prose passages written by scientists about science supplemented by notes and a brief linking commentary Originally published in 1965 the passages were chosen to illustrate or comment on different aspects of eleven main themes ranging from surveys of changing ideas on the nature of the universe and the material of which it was made to evolution past and future and the relation of science with religion and art Most of the extracts were from contemporary authors but there are passages by Aristotle Bacon Boyle Hooke Newton Dalton Faraday and Darwin At the end of the book there are suggestions for discussion to accompany each chapter to encourage the study of the use of language in consideration of the nature history and role of science
