

CHAPTER 3

Structuring Decisions

Notes

Chapters 3 and 4 might be considered the heart of *Making Hard Decisions* with *DecisionTools*. Here is where most of the action happens. Chapter 3 describes the process of structuring objectives and building influence diagrams and decision trees. Chapter 4 discusses analysis. The chapter begins with a comprehensive discussion of value structuring and incorporates value-focused thinking throughout. Constructing influence diagrams and decision trees to reflect multiple objectives is demonstrated, and the chapter contains a discussion of scales for measuring achievement of fundamental objectives, including how to construct scales for objectives with no natural measures.

Understanding one's objectives in a decision context is a crucial step in modeling the decision. This section of the chapter shows how to identify and structure values, with an important emphasis on distinguishing between fundamental and means objectives and creating hierarchies and networks, respectively, to represent these. The fundamental objectives are the main reasons for caring about a decision in the first place, and so they play a large role in subsequent modeling with influence diagrams or decision trees.

Students can generally grasp the concepts of influence diagrams and how to interpret them. Creating influence diagrams, on the other hand, seems to be much more difficult. Thus, in teaching students how to create an influence diagram for a specific situation, we stress basic influence diagrams, in particular the basic risky decision and imperfect information. Students should be able to identify these basic forms and modify them to match specific problems. The problems at the end of the chapter range from simple identification of basic forms to construction of diagrams that are fairly complex.

The discussion of decision trees is straightforward, and many students have already been exposed to decision trees somewhere in their academic careers. Again, a useful strategy seems to be to stress some of the basic forms.

Also discussed in Chapter 3 is the matter of including in the decision model appropriate details. One issue is the inclusion of probabilities and payoffs. More crucial is the clarity test and the development of scales for measuring fundamental objectives. The matter of clarifying definitions of alternatives, outcomes, and consequences is absolutely crucial in real-world problems. The clarity test forces us to define all aspects of a problem with great care. The advantage in the classroom of religiously applying the clarity test is that the problems one addresses obtain much more realism and relevance for the students. It is very easy to be lazy and gloss over definitional issues in working through a problem (e.g., "Let's assume that the market could go either up or down"). If care is taken to define events to pass the clarity test ("The market goes up means that the Standard & Poor's 500 Index rises"), problems become more realistic and engaging.

The last section in Chapter 3 describes in detail how to use PrecisionTree for structuring decisions. The instructions are intended to be a self-contained tutorial on constructing decision trees and influence diagrams. PrecisionTree does have an interactive video tutorial along with video tutorials on the basics and videos from experts. These videos along with example spreadsheets and the manual all can be found in the PrecisionTree menu ribbon under Help, then choosing Welcome to PrecisionTree.

Please note that if you enter probability values that do not sum to 100% for a chance node, then the program uses normalized probability values. For example, if a chance node has two branches and the corresponding probabilities entered are (10%, 80%), then the model will use (11.11%, 88.89%) – i.e., $0.1/(0.1+0.8)$ and $0.8/(0.1+0.8)$.

Because this chapter focuses on structuring the decision, many of the problems do not have all of the numbers required to complete the model. In some cases, the spreadsheet solution provides the structure of the problem only, and the formulas were deleted (for example, problem 3.10). In other cases, the model is

Making Hard Decisions Chapter 11 Solutions

Taking Care of Mom and Dad Mike Rust, First Last, 2003-02 In Father to the Man author Mike Rust explores the mechanics of caring for your parents everything from establishing power of attorney to making sure money is invested well

E-Journals Access and Management Wayne Jones, 2008-09 The proliferation of e journals and their impact on library collections is tremendous E Journals Access and Management takes a comprehensive look at how e journals have changed the library landscape and offers librarians strategies to better manage them This useful resource provides a broad overview of the practical and theoretical issues associated with the management of electronic journals and contains practical and illuminating case studies of problems faced and solutions found in individual libraries Containing chapters by respected authorities on this dynamic topic of debate E Journals Access and Management presents vital information on a full range of issues dealing with electronic resource access and management including bibliographic and web access acquisitions and licensing

Educational Audiology Handbook, Fourth Edition Cheryl DeConde Johnson, Jane B. Seaton, 2025-02-25 The fourth edition of Educational Audiology Handbook

continues to provide essential strategies for collaborating effectively with educators parents and other professionals to support students who need audiology services in school settings This book emphasizes evidence based practices ensuring educational audiologists are equipped with the latest research and methodologies to enhance student outcomes Newly authored by contributors who practice as educational audiologists in local or regional school districts each chapter emphasizes an integration of real world experiences and case studies that reflect current challenges and successes in the field With a focus on practical applications readers will find assessment intervention and program development tools grounded in the latest evidence New to the Fourth Edition Three new chapters Advocating for Educational Audiology Services Remote Service Delivery Development and Management of Contracted Educational Audiology Services New contributors to introduce fresh perspectives relevant to today s educational audiology practice Updated to reflect current terminology legislative information and best practice essentials Expanded information and resources related to classroom acoustics and learning environments Updated perspectives on topics including auditory processing deficits hearing technology out of booth assessment student wellness and social emotional competence and the audiologist s role in supporting the educational goal for students with hearing related needs Key Features Each chapter introduction includes lists of key terms key points and sample questions for instructors students and practicing educational audiologists Chapters include updated list of selected readings and resources Extensive appendices with customizable handouts forms and protocols ready for local use

Blood Money Margaret Sankey, 2022-10-15 It is convenient to think that bad guys are drumming up money for their activities far away and in shady back alleys but the violent non state actors VNSAs of the world are hiding in plain sight They peddle knockoff sneakers pass the hat at ethnic festivals take a cut of untaxed booze sales swindle senior citizens with bogus phone calls about needing bail in Mexico and run money through mainstream banks to buy up rental properties just to name a few On a grand scale their behavior erodes rule of law creates moral injuries from corruption and emboldens bad actors to steal and back violent tactics with impunity Blood Money analyzes the ways in which VNSAs find money for their operations and sustainment from controlling a valuable commodity to harnessing the grievances of a networked diaspora and it looks at the channels through which they can flip the positives of globalization into flat fast and frictionless movement of people funds and materials needed to terrorize and coerce their opponents Author Margaret Sankey highlights the mundane and everyday nature of these tactics occurring under our noses online in legitimate marketplaces and with the aegis of intelligence services and national governments While reforms attempt to curtail these options their utility and efficacy as tools of finance have proved inadequate for sovereign states VNSAs defiance of rules and their capable adaptation and innovation make them extremely difficult to pin down or prosecute Many security publications stress legislation and enforcement or frame illicit finance as a military or police problem With Blood Money Sankey points out the many ways VNSAs evade law enforcement and she offers options for involving consumers and activists in exercising

agency and choices in how they apply their money and where it goes Blood Money also provides context for whole of government approaches to attacking underlying supports for illicit financing channels How these groups finance themselves is key to understanding how they function and what actions might be taken to derail their plans or dismantle their structure

You and Your Aging Parents ,2009 In this timely new book the professionals at the ABA provide comprehensive clear and practical guidance on how to plan for and secure aging parents financial and emotional well being The guide covers topics including housing healthcare power of attorney and more **Leadership Strategies for Community College**
