Morris, 1960     **Practical Ethics** the late Henry Sidgwick, 1998-06-18 A classic work in the field of practical and professional ethics this collection of nine essays by English philosopher and educator Henry Sidgwick 1838 1900 was first published in 1898 and forms a vital complement to Sidgwick s major treatise on moral theory *The Methods of Ethics* Reissued here as Volume One in a new series sponsored by the Association for Practical and Professional Ethics the

book is composed chiefly of addresses to members of two ethical societies that Sidgwick helped to found in Cambridge and London in the 1880s. Clear, taut and lively, these essays demonstrate the compassion and calm reasonableness that Sidgwick brought to all his writings. As Sidgwick explains in his opening essay, the societies he addressed aimed to allow academics, professionals and others to pursue joint efforts at reaching some results of value for practical guidance and life. Sidgwick hoped that members might discuss such questions as when, if ever, public officials might be justified in lying or in breaking promises; whether scientists could legitimately inflict suffering on animals for research purposes; when nations might have just cause in going to war; and a score of other issues of ethics in public and private life still debated a century later. This valuable reissue returns *Practical Ethics* to its rightful place in Sidgwick's oeuvre. Noted ethicist Sissela Bok provides a superb Introduction ranging over the course of Sidgwick's life and career and underscoring the relevance of *Practical Ethics* to contemporary debate. She writes: *Practical Ethics* is the last book that Henry Sidgwick published before his death in 1900; it contains the distillation of a lifetime of reflection on ethics and on what it would take for ethical debate to be really of use in the solution of practical questions. This rich, engaging work is essential reading for all concerned with the relationship between ethical theory and practice and with the questions that have driven the study of professional ethics in recent years.

**Modeling and Computation in Engineering III** Lei Zhang, Liquan Xie, 2014-06-11. The demands of modeling and computation in engineering are rapidly growing as a multidisciplinary area with connections to engineering, mathematics and computer science. *Modeling and Computation in Engineering III* contains 45 technical papers from the 3rd International Conference on Modeling and Computation in Engineering (CMCE 2014), 28-29 June 2014, including 2014 Hydraulic Engineering and Environment Workshop (HEEW 2014). The conference serves as a major forum for researchers, engineers and manufacturers to share recent advances, discuss problems and identify challenges associated with modeling, technology, simulation, technology and tools, computation methods and their engineering applications. The contributions showcase recent developments in the areas of civil engineering, hydraulic engineering, environmental engineering and systems engineering and other related fields. The contributions in this book mainly focus on advanced theories and technology related to modeling and computation in civil engineering, hydraulic structures, hydropower and management, coastal reclamation and environmental assessment, flood control, irrigation and drainage, water resources and water treatment, environmental management and sustainability, waste management and environmental protection, pollution and control, geology and geography, mechanics in engineering, numerical software and applications. Although these papers represent only modest advances toward modeling and computation problems in engineering, some of the technologies might be key factors in the success of future engineering advances. It is expected that this book will stimulate new ideas, methods and applications in ongoing engineering advances. *Modeling and Computation in Engineering III* will be invaluable to academics and professionals in civil engineering, hydraulic engineering and environmental engineering. *Intelligent Automation and*

*Computer Engineering* Oscar Castillo, He Huang, 2010-07-17 A large international conference in Intelligent Automation and Computer Engineering was held in Hong Kong March 18-20, 2009 under the auspices of the International MultiConference of Engineers and Computer Scientists IMECS 2009.
