The Knowledge Gap Natalie Wexler, 2019-08-06 Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America s education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country s frustrating lack of progress when it comes to providing every child with a quality education The problem wasn t one of the usual scapegoats lazy teachers shoddy facilities

lack of accountability It was something no one was talking about the elementary school curriculum s intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff s The Prize and Dana Goldstein s The Teacher Wars Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But The Knowledge Gap isn t just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention

Philip Roth Ira Bruce Nadel, 2021 In Philip Roth A Counterlife Ira Nadel exposes the multifaceted disposition of this major voice in American letters Roth the realist the ironist the ventriloquist the impersonator the bard In navigating the intricacies and dualities of the public and private Roth Nadel shows the complexities the contradictions and the counterlives both lived and imagined As literary sleuth Nadel has enriched the myriad possibilities for understanding this exacting and defiant writer and his work Professor Nadel's study is always very readable and compelling but its discussion of material that has never been accessed before is particularly exciting Philip Roth A Counterlife engages and illuminates the scenes of discontent betrayal illness and rage in Roth's own life that allow for new understandings of his work and relationships Drawing on such primary source material as interviews personal correspondence and site visits Nadel's biography penetrates the carefully composed narrative Roth presented publicly in order to present a counter Philip Roth one who is at once more sympathetic to his readers than critics realize and more dynamic than even his self creation allows Nadel seamlessly weaves his interpretations of Roth's most provocative texts into the story of Roth's own life a life shadowed by pain illness and personal injustices but also illuminated by the joys of writing ideas and friendships that will persist long after his death Book jacket

Grading the College Scott M. Gelber, 2020-06-23 A comprehensive history of evaluation in American higher education In Grading the College Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty

members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability Grading the College seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education

Razzaque,2023-03-02 **The Normal Accident Theory of Education** Andrew K. Milton,2014-04-01 Much of the current debate about education too often resembles the blind men describing an elephant

apprehending only a particular part of the situation or the process many analysts tell an evocative but incomplete story The so called reform discussion proceeds with a lack of depth about the nuances and realistic limitations in the institutional order of school This book argues that as regulation of schools moves further up the bureaucratic hierarchy first to state departments of education then to the national department of education the legal and institutional requirements get more intensive but less concretely useful in class rooms This bureaucratization serves to tighten the organizational environment thereby increasing the risk of normal accidents The increasing governmental management in other words makes it more likely that schools will fail to meet their goals Analyses of education are too often developed for public consumption in a fast moving political world This book examines some of the deeper organizational reasons why things don t work so well in school as well as a look at some of things that do work Most importantly the book will explain how the social and cultural expectations of what schools can do may create unrealistic hopes We as a society and schools as institutions embrace these unreasonably high hopes at our collective peril Check out Andrew s latest interview with Seattle Radio <http://kiroradio.com> listen 9972862
