Unit 8 Study Guide – Answer Key

Use the following drawing of a back yard for answer questions 1-3. Be sure to pay attention to the units in the questions.

1. My family wants to put a fence around the yard. The fence is sold by the **foot**. How many **feet** would my family need to surround the back yard? Explain how you know. Show your work below.

$$10 + 10 + 8 \frac{1}{5} + 8 \frac{1}{5} = 36 \frac{2}{5} \text{ yards}$$

$$36 \frac{2}{5} \times 3 = 109 \frac{1}{5}$$

They should buy 109 1/5 feet of fencing.

Explain your answer. Sample Answer:

I found the perimeter of the yard by adding the four sides, $10 + 10 + 8 \frac{1}{5} + 8 \frac{1}{5} = 36 \frac{2}{5}$.

Then I multiplied the perimeter by 3 because there are 3 feet in 1 yard.

2. My family wants to add soil (new grass) to the backyard.

- a. What is the area of the backyard in **square yards**?

$$8 \frac{1}{5} \times 10 = 82$$

Area is 82 square yards (include units)

The Cost-Effectiveness of 22 Approaches for Raising Student Achievement Stuart S. Yeh, 2011-03-01 As a consequence of the federal No Child Left Behind NCLB law there is tremendous pressure on school principals teachers school superintendents district staff state departments of education and governors to maximize the increase in student achievement that is obtained with every dollar of expenditure Currently teachers are forced to rely on extremely inefficient approaches that take enormous amounts of time both during the school day and throughout the K 12 learning years This is experienced in terms of the reduced time that is available to teach subjects other than math and reading as schools resort to double periods of math double periods of reading and enormous amounts of remedial instruction that directly reduce the time available for other subjects including science art and music In contrast this book suggests that student achievement may be increased in a way that is not only cost effective in dollar terms but efficient in the sense that it does not rely on unusual investments in the time required to obtain results The book draws upon a wealth of cost effectiveness data to dispel common notions about what works in addressing the achievement gap increased expenditure per pupil charter schools voucher programs increased educational accountability class size reduction comprehensive school reform increased teacher salaries more selective teacher recruitment the use of value added methods to measure and reward teacher performance the use of National Board teacher certification to identify high performing teachers and a host of other approaches **Class 9**
