Understanding our Edexcel International AS and A level grade boundaries

This document shows the grade boundaries for our modular Edexcel International AS and A level qualifications. For each set of grade boundaries, the maximum number of available marks is also shown.

For individual units, maximum marks and boundaries are shown for both the raw and uniform (UMS) mark scales. Maximum marks and grade boundaries for the overall qualification (the 'cash-in') are only shown in UMS marks.

International AS units and overall qualifications (cash-ins) are graded A to E. International A2 units are graded A to E but we publish the theoretical A* boundary. Overall International A level qualifications (cash-ins) are graded A* to E.

Where grade boundaries are greyed out for a particular unit, there are no grade boundaries available. This may be because:

- the unit was not available in this exam session
- no-one took the unit in this exam session

Definition of terms

A grade boundary is the minimum mark at which a letter grade can be achieved. For example, if the grade boundary for a B is 60 marks, then 60 is the minimum grade mark at which a B can be achieved. A mark of 59 would therefore be a C grade.

For modular qualifications, assessments can be taken in various exam sessions throughout the duration of the course.

For linear qualifications, all assessments must be taken in the same exam session.

A raw mark is the actual mark awarded by the teacher or examiner for an assessment. Raw mark scores can be downloaded by Exams Officers from Edexcel Online.

Raw marks are converted to UMS marks for all modular qualifications. This is because raw mark grade

Florida Water Resources Law Roy H. Lasris, 1977 **Pushing Sacred Boundaries in Early Judaism and the Ancient Mediterranean**, 2023-06-05 This volume celebrates Jodi Magness's long and illustrious career as a scholar of archaeology, early Judaism and the ancient Mediterranean world. It brings together a series of studies on history, archaeology and society in Roman, Byzantine and Islamic Palestine, Qumran and the Dead Sea Scrolls and ancient synagogues written by her colleagues, students and friends. The collected essays reflect the extraordinary range of historical and archaeological issues which Magness has elucidated through her outstanding work as well as make significant contributions to their respective fields. Some articles publish archaeological data for the first time, others re-evaluate traditional assumptions within new methodological or theoretical frameworks and others proffer innovative interpretations of old data. State and National Boundaries of the United States Gary Alden Smith, 2015-06-08 With the exception of oceans, boundaries are artificial, man-made divisions of geography that many times make little sense and sometimes no sense at all. For example, why does the northern boundary of Minnesota protrude into Canada? Why does West Virginia have two panhandles? Why do Pennsylvania and Delaware have a common boundary that is a circle segment? Why do the boundaries of Colorado, Wyoming and Utah consist entirely of lines of latitude and longitude? The answers to these questions and many more can be found in this book, which explains why and how state boundaries are placed where they are. It begins with an introduction that provides general information about boundary placement, colonial boundaries, formation of territories, surveying and Supreme Court rulings. The 50 states are divided into ten regions: New England, Mid Atlantic, Upper South, Lower South, Great Lakes, North Central, South Central, Rocky Mountain, West and Noncontiguous. The text for each state begins with an overview of that state's boundaries that becomes more specific as its different boundaries are considered. The appendices include interesting facts about each state, citizen and state nicknames and dates territories were created and states entered the Union. Richly illustrated with 138 maps. Boundary Changes in Criminal Justice Organizations, Vol. 2, Criminal Justice 2000, (July 2000), 2000 **Dryland Climatology** Sharon E. Nicholson, 2011-10-27 A comprehensive review of dryland climates and their relationship to the physical environment, hydrology and inhabitants. Chapters are divided into five major sections: on background meteorology and climatology, the nature of dryland climates in relation to precipitation and hydrology, the climatology and climate dynamics of the major dryland regions on each continent and life and change in the world's drylands. It includes key topics such as vegetation, geomorphology, desertification, micro habitats and adaptation to dryland environments. This interdisciplinary volume provides an extensive review of the primary literature covering nearly 2000 references and the conventional and satellite datasets that form key research tools for dryland climatology. Illustrated with over 300 author photographs, it presents a unique view of dryland climates for a broad spectrum of researchers, environmental professionals and advanced students in climatology, meteorology, geography, environment science, earth system science, ecology, hydrology.

 David Hopkin, 2012-04-26 This innovative study of the lives of ordinary people: peasants, fishermen, textile workers in nineteenth-century France demonstrates how folklore collections can be used to shed new light on the socially marginalized. David Hopkin explores the ways in which people used traditional genres such as stories, songs, and riddles to highlight problems in their daily lives and give vent to their desires without undermining the two key institutions of their social world: the family and the community. The book addresses recognized problems in social history such as the division of power within the peasant family, the maintenance of communal bonds in competitive environments, and marriage strategies in unequal societies, showing how social and cultural history can be reconnected through the study of individual voices recorded by folklorists. Above all, it reveals how oral culture provided mechanisms for the poor to assert some control over their own destinies.
