
Abnormal psychology

Study guide

For each of the following learning objectives, **list** two to three pieces of research that you could use to answer the question. Remember, that “research” may be a study and/or theory.

General framework

To what extent do biological, cognitive and sociocultural factors influence abnormal behaviour? *For this question you should be able to write an essay on each of the levels of analysis. So, you could be asked: To what extent do biological factors influence abnormal behaviour? To answer this question you may use any of the research for this unit. I highly recommend that you use your research on aetiologies.*

Level of analysis	Research
Biological	1. Genetics: Nuermberger & Gershon 2. Diathesis Stress Model 3. Serotonin hypothesis.
Cognitive	1. Schema theory (Beck's cognitive triad) 2. Irrational thinking (Beck) 3. the role of rumination (Hocksema)
Sociocultural	1. Brown & Harris - Vulnerability model 2. Kirmayer's explanatory models & culture 3. Emic vs. etic approaches to abnormal behaviour (Bolton)

Evaluate psychological research (that is, theories and/or studies) relevant to the study of abnormal behaviour. *For this question you may choose any research or theory that you want to evaluate. IMHO, I would look at one of the theories of a disorder - for example, the Serotonin hypothesis or the Vulnerability models. If you choose a theory, it is easier to then link research studies in the evaluation. If you just choose different studies, the essay may be unfocused.*
