Charles Brenke, 1917 **A Text-book on Advanced Algebra and Trigonometry, with Tables** William Charles Brenke, 1910 **Higher Algebra** Herbert Edwin Hawkes, 1913 **Topics in Factorization of Abelian Groups** Sandor Szabo, 2004-10-25 The main objective of this book is to give a systematic exposition of the main results and techniques of the factorization theory of abelian groups The necessary background materials are presented along with some of the most important applications in geometry combinatorics coding theory and number theory A large part of the text is accessible to students requiring only basic knowledge in group theory and algebra Helpful exercises are provided in every chapter

Algebra VII D.J. Collins, R.I. Grigorchuk, P.F. Kurchanov, H. Zieschang, 2013-12-01 From the reviews The book under review consists of two monographs on geometric aspects of group theory Together these two articles form a wide ranging survey of combinatorial group theory with emphasis very much on the geometric roots of the subject This will be a useful reference work for the expert as well as providing an overview of the subject for the outsider or novice Many different topics are described and explored with the main results presented but not proved This allows the interested reader to get the flavour of these topics without becoming bogged down in detail Both articles give comprehensive bibliographies so that it is possible to use this book as the starting point for a more detailed study of a particular topic of interest Bulletin of the London

Mathematical Society 1996 **Purity, Spectra and Localisation** Mike Prest, 2009-06-04 It is possible to associate a topological space to the category of modules over any ring This space the Ziegler spectrum is based on the indecomposable pure injective modules Although the Ziegler spectrum arose within the model theory of modules and plays a central role in that subject this book concentrates specifically on its algebraic aspects and uses The central aim is to understand modules and the categories they form through associated structures and dimensions which reflect the complexity of these and similar categories The structures and dimensions considered arise particularly through the application of model theoretic and functor category ideas and methods Purity and associated notions are central localisation is an ever present theme and various types of spectrum play organising roles This book presents a unified coherent account of material which is often presented from very different viewpoints and clarifies the relationships between these various approaches **Introduction to Higher Algebra** Maxime Bôcher, 1907 **Algebra in the Early Grades** James J. Kaput, David W. Carraher, Maria L. Blanton, 2017-09-25 This volume is the first to offer a comprehensive research based multi faceted look at issues in early algebra In recent years the National Council for Teachers of Mathematics has recommended that algebra become a strand flowing throughout the K 12 curriculum and the 2003 RAND Mathematics Study Panel has recommended that algebra be the initial topical choice for focused and coordinated research and development in K 12 mathematics This book provides a rationale for a stronger and more sustained approach to algebra in school as well as concrete examples of how algebraic reasoning may be developed in the early grades It is organized around three themes The Nature of Early Algebra Students Capacity for Algebraic Thinking Issues of Implementation Taking Early Algebra to the Classrooms The contributors to this landmark volume have been at the forefront of an effort to integrate algebra into the existing early grades mathematics curriculum They include scholars who have been developing the conceptual foundations for such changes as well as researchers and developers who have led empirical investigations in school settings Algebra in the Early Grades aims to bridge the worlds of research practice design and theory for educators researchers students policy makers and curriculum developers in mathematics education
