Deep Learning Methods and Applications in Brain Imaging for the Diagnosis of Neurological and Psychiatric Disorders Hao Zhang, Da Ma, Lei Wang, 2024-10-14 Brain imaging has been successfully used to generate image based biomarkers for various neurological and psychiatric disorders such as Alzheimer's and related dementias Parkinson's disease stroke traumatic brain injury brain tumors depression schizophrenia etc However accurate brain image based diagnosis at the individual level remains elusive and this applies to the diagnosis of neuropathological diseases as well as clinical syndromes In recent years deep learning techniques due to their ability to learn complex patterns from large amounts of data have had remarkable success in various fields such as computer vision and natural language processing Applying deep learning methods to brain imaging assisted diagnosis while promising is facing challenges such as insufficiently labeled data difficulty in interpreting diagnosis results variations in data acquisition in multi site projects integration of multimodal data clinical heterogeneity etc The goal of this research topic is to gather cutting edge research that showcases the application of deep learning methods in brain imaging for the diagnosis of neurological and psychiatric disorders We encourage submissions that demonstrate novel approaches to overcome various abovementioned difficulties and achieve more accurate reliable generalizable and interpretable diagnosis of neurological and psychiatric disorders in this field [Machine Learning and Decision Support in Stroke](#) Fabien Scalzo, David S. Liebeskind, 2020-07-09 **Biomedical Image Analysis and Machine Learning Technologies: Applications and Techniques** Gonzalez, Fabio A., Romero, Eduardo, 2009-12-31 Medical images are at the base of many routine clinical decisions and their influence continues to increase in many fields of medicine Since the last decade computers have become an invaluable tool for supporting medical image acquisition processing organization and analysis Biomedical Image Analysis and Machine Learning Technologies Applications and Techniques provides a panorama of the current boundary between biomedical complexity coming from the medical image context and the multiple techniques which have been used for solving many of these problems This innovative publication serves as a leading industry reference as well as a source of creative ideas for applications of medical issues [Novel Methods for Oncologic Imaging Analysis: Radiomics, Machine Learning, and Artificial Intelligence](#) Xuelei Ma, Lei Deng, Rong Tian, Chunxiao Guo, 2021-09-23 **Statistical model-based computational biomechanics: Applications in joints and internal organs** Emmanuel A. Kevin Zhou, 2015-12-11 This book describes the technical problems and solutions for automatically recognizing and parsing a medical image into multiple objects structures or anatomies It gives all the key methods including state of the art approaches based on machine learning for recognizing or detecting parsing or segmenting a cohort of anatomical structures from a medical image Written by top experts in Medical Imaging this book is ideal for university researchers and industry practitioners in medical imaging who want a complete reference on key methods

algorithms and applications in medical image recognition segmentation and parsing of multiple objects Learn Research challenges and problems in medical image recognition segmentation and parsing of multiple objects Methods and theories for medical image recognition segmentation and parsing of multiple objects Efficient and effective machine learning solutions based on big datasets Selected applications of medical image parsing using proven algorithms Provides a comprehensive overview of state of the art research on medical image recognition segmentation and parsing of multiple objects Presents efficient and effective approaches based on machine learning paradigms to leverage the anatomical context in the medical images best exemplified by large datasets Includes algorithms for recognizing and parsing of known anatomies for practical applications

Artificial Intelligence and Imaging for Oncology Poonam Yadav, Zhimin Li ,Yuxiang Zhou,2025-02-18

Recent progress in artificial intelligence AI and advanced imaging techniques have brought about exciting diagnostic and therapeutic opportunities in oncology More and more state of the art CT PET and MRI imaging techniques are being applied to tumor imaging and new interdisciplinary field such as MR LINAC is booming We feel there s an urgent need to organize a Research Topic to highlight the application of AI and imaging for various oncology branches such as radiation therapy as we are witnessing an accelerated integration of imaging and therapy to improve the care of cancer patients Imaging has also been the backbone of the oncology world It is used for diagnosis as well as planning MRI has a superior soft tissue contrast but lacks the electron density information for the dose calculation alternative approaches use synthetic CT for dose calculation The development of the MRI guided system and online adaptation can be considered as the bridge between many specialties starting from learning about MRI safety by the therapy physicist to the use of AI for robust planning Active research is done to improve the images advanced MRI techniques Nuclear medicine and PET MRI synthetic images CBCT for dose calculation for clinical workflows However all these topics have a lot of room for exploration

Image-guided Radiation Therapy Arno J. Mundt, John C. Roeske, 2010-12-31 Image Guided Radiation Therapy IGRT is a true revolution in the field of radiation oncology IGRT provides the unprecedented means of conforming dose to the shape of the target tissues in 3 dimensions reducing the risk of complications thereby improving the quality of life of irradiated patients Moreover IGRT provides the means to deliver higher than conventional doses thus improving the chance of cure in these patients Despite its established benefits several barriers exist to the widespread clinical implementation of IGRT In the past great concerns existed regarding the large capital outlay needed for both software and hardware This barrier is less relevant today given the increased reimbursements possible with IGRT Today the most significant barrier is education IGRT is a fundamentally new approach to both treatment planning and delivery Adoption of the IGRT approach entails new ways of thinking in regard to patient selection treatment planning and quality assurance measures Unfortunately apart from a few University based short courses limited resources are available for the physician and physicist interested in learning IGRT
