Migration Michael H. Fisher, 2013-11-04 Migration began with our origin as the human species and continues today Each chapter of world history features distinct types of migration The earliest migrations spread humans across the globe Over the centuries as our cultures societies and technologies evolved in different material environments migrants conflicted merged and cohabited with each other creating entering and leaving various city states kingdoms empires and nations During the early modern period migrations reconnected the continents including through colonization and forced migrations of subject peoples while political concepts like citizen and alien developed In recent history migrations changed their character as nation states and transnational unions sought in new ways to control the peoples who migrated across their borders This volume will explore the process of migration chronologically and also at several levels from the illuminating example of the migration of a individual community to larger patterns of the collective movements of major ethnic groups to the more abstract study of the processes of emigration migration and immigration This book will concentrate on substantial migrations covering long distances and involving large numbers of people It will intentionally balance evidence from the now diverse people s of the world for example by highlighting an exemplary migration for each of the six chapters that highlights different trajectories and by keeping issues of gender and socio economic class salient wherever appropriate Further as a major theme the volume will consider how technology the environment and various polities have historically shaped human migration Exciting new scholarship in the several fields inherent in this topic make it a particularly valuable and timely project

Hanciles,2021-03-16 A magisterial sweep through 1500 years of Christian history with a groundbreaking focus on the missionary role of migrants in its spread Human migration has long been identified as a driving force of historical change Building on this understanding Jehu Hanciles

surveys the history of Christianity's global expansion from its origins through 1500 CE to show how migration more than official missionary activity or imperial designs played a vital role in making Christianity the world's largest religion. Church history has tended to place a premium on political power and institutional forms thus portraying Christianity as a religion disseminated through official representatives of church and state. But as Hanciles illustrates this top-down perspective overlooks the multifarious array of social movements, cultural processes, ordinary experiences and non-elite activities and decisions that contribute immensely to religious encounter and exchange. Hanciles's socio-historical approach to understanding the growth of Christianity as a world religion disrupts the narrative of Western preeminence while honoring and making sense of the diversity of religious expression that has characterized the world Christian movement for two millennia. In turning the focus of the story away from powerful empires and heroic missionaries, *Migration and the Making of Global Christianity* instead tells the more truthful story of how every Christian migrant is a vessel for the spread of the Christian faith in our deeply interconnected world. — *Illegal Migration and Gender in a Global and Historical Perspective* Marlou Schrover, 2008. This incisive study combines the two subjects and views the migration scholarship through the lens of the gender perspective. — Understanding Global Migration James F. Hollifield, Neil Foley, 2022-03-01. *Understanding Global Migration* offers scholars a groundbreaking account of emerging migration states around the globe, especially in the Global South. Leading scholars of migration have collaborated to provide a bird's-eye view of migration interdependence. *Understanding Global Migration* proposes a new typology of migration states, identifying multiple ideal types beyond the classical liberal type. Much of the world's migration has been to countries in Asia, Africa, the Middle East, and South America. The authors assembled here account for diverse histories of colonialism, development, and identity in shaping migration policy. This book provides a truly global look at the dilemmas of migration governance: Will migration be destabilizing or will it lead to greater openness and human development? The answer depends on the capacity of states to manage migration, especially their willingness to respect the rights of the ever-growing portion of the world's population that is on the move. — *Handbook of International Migration* Steven J. Gold, Stephanie J. Nawyn, 2013-05-02. This revised and expanded second edition of *Routledge International Handbook of Migration Studies* provides a comprehensive basis for understanding the complexity and patterns of international migration. #### **Migration, Trade, and Slavery in an Expanding World** Wim

Klooster, 2009 The twelve essays explore three connected aspects of European expansion in the period between 1500 and 1900 migration trade and slavery with some attention given to present day echoes from that era The book's first section deals with European migration to transatlantic and Asian destinations the second and third sections focus on the Atlantic slave trade and representations of slavery and the final section analyzes the demise and legacy of slavery The authors reach surprising conclusions European expansion did not entail major economic benefits the small scale of the Europeans intercontinental migration never jeopardized their colonial projects and the unique popular nature of British abolitionism can be explained in part by the growth of the newspaper press in the mid eighteenth century which regularly reported about slave ship revolts

#### **Global Labor Migration** Eileen Boris, Heidi Gottfried, Julie Greene, Joo-Cheong Tham, 2022-12-27

Around the world hundreds of millions of labor migrants endure exploitation lack of basic rights and institutionalized discrimination and marginalization What dynamics and drivers have created a world in which such a huge and rapidly growing group toils as marginalized men and women existing as a lower caste institutionally and juridically In what ways did labor migrants shape their living and working conditions in the past and what opportunities exist for them today Global Labor

Migration presents new multidisciplinary transregional perspectives on issues surrounding global labor migration. The essays go beyond disciplinary boundaries with sociologists, ethnographers, legal scholars, and historians contributing research that extends comparison among and within world regions. Looking at migrant workers from the late nineteenth century to the present day, the contributors illustrate the need for broader perspectives that study labor migration over longer timeframes and from wider geographic areas. The result is a unique, much-needed collection that delves into one of the world's most pressing issues, generates scholarly dialogue, and proposes cutting-edge research agendas and methods.

**Migration in Africa** Michiel de Haas, Ewout Frankema, 2022-03-30. This book introduces readers to the age of intra-African migration, a period from the mid-19th century onward in which the center of gravity of African migration moved decisively inward. Most books tend to zoom in on Africa's external migration during the earlier intercontinental slave trades and the more recent outmigration to the Global North, but this book argues that migration within the continent has been far more central to the lives of Africans over the course of the last two centuries. The book demonstrates that only by taking a broad historical and continent-wide perspective can we understand the distinctions between the more immediate drivers of migration and deeper patterns of change over time. During the 19th century, Africa's external slave trades gradually declined, whilst Africa's expanding commodity export sectors drew in domestic labor. This led to an era of heightened mobility within the region, marked by rapidly rising and vanishing migratory flows, increasingly diversified landscapes of migration systems, and profound long-term shifts in the wider patterns of migration. This era of inward-focused mobility reduced with a resurgence of outmigration after 1960, when Africans became more deliberate in search of extra-continental destinations, with new diaspora communities emerging specifically in the Global North. Broad-ranging in its temporal, spatial, and thematic coverage, this book provides students and researchers with the perfect introduction to the age of intra-African migration.
