Smart Strategies and Societal Solutions for Sustainable International Business Derbali, Abdelkader Mohamed Sghaier, 2023-11-17 The United Nations 17 Sustainable Development Goals (SDGs) were set with a target date of 2030 and they represent our collective endeavors for a more sustainable future. However, seven years since their introduction, international business scholars have yet to fully comprehend their potential to lead these goals. This critical gap raises a pressing question: why has the academic community not fully harnessed its power to advance the SDGs? Amid an abundance of scholarly publications on ethics and responsible governance, corporate social responsibility (CSR), sustainable development, and environmental concerns, the spotlight has dimmed on the pivotal role that international business can play in this transformative agenda. *Smart Strategies and Societal Solutions for Sustainable International Business* solves this issue with chapters developed specifically for academic scholars. This book serves as a comprehensive guide to unleash the untapped potential of international business in promoting the SDGs. Covering a wide range of disciplines from information sciences to sociology and environmental studies, it equips scholars with the knowledge and tools they need to push sustainable international business to the forefront of the global agenda. With a meticulous exploration of crucial topics such as corporate governance, digital transformation, environmental sustainability, social responsibility, and more, this book offers a blueprint for academic scholars to spearhead the charge toward a more sustainable and equitable world. **Regional and Global**

Multinationals Christoph Czychon, 2021-06-29 Based on their ability to facilitate interdependencies across the borders of national and regional markets, multinationals (MNEs) act as the key drivers of world trade and investment activities. While recent global challenges additionally highlight the need to explain and assess the status and progress of internationality, regional research renders the concept of firm-level globalization as a special but not the general case. Christoph Czychon dedicates specific attention to the research on regional and global MNEs based on an extensive and rigorous review of the existing academic literature as well as the analysis of 2005-2015 empirical data from the European context with a focus on CAC40 and DAX30 listed firms. In doing so, the author offers insights and results that stand in contrast to the original narrative of the debate and presents a comprehensive and updated perspective on regional and global MNEs.
