

The Future of Nursing

Leading Change, Advancing Health

With more than 3 million members, the nursing profession is the largest segment of the nation's health care workforce. Working on the front lines of patient care, nurses can play a vital role in helping realize the objectives set forth in the 2010 Affordable Care Act, legislation that represents the broadest health care overhaul since the 1965 creation of the Medicare and Medicaid programs. A number of barriers prevent nurses from being able to respond effectively to rapidly changing health care settings and an evolving health care system. These barriers need to be overcome to ensure that nurses are well-positioned to lead change and advance health.

In 2008, The Robert Wood Johnson Foundation (RWJF) and the Institute of Medicine (IOM) launched a two-year initiative to respond to the need to assess and transform the nursing profession. The IOM appointed the Committee on the RWJF Initiative on the Future of Nursing, at the IOM, with the purpose of producing a report that would make recommendations for an action-oriented blueprint for the future of nursing.

Nurses practice in many settings, including hospitals, schools, homes, retail health clinics, long-term care facilities, battlefields, and community and public health centers. They have varying levels of education and competencies—from licensed practical nurses, who greatly contribute to direct patient care in nursing homes, to nurse scientists, who research and evaluate more effective ways of caring for patients and promoting health. The committee considered nurses across roles, settings, and education levels in its effort to envision the future of the profession. Through its deliberations, the committee developed four key messages that structure the recommendations presented

Example Of Nursing Report:

The Nurse as Executive Barbara Stevens Barnum, Karlene M. Kerfoot, 1995 This new edition of Aspen's bestselling book *The Nurse as Executive* has been thoroughly revised and updated to reflect the significant changes in nursing management. The nurse executive's role as a member of the executive team is examined as well as the nurse executive's role in health care issues such as quality outcomes, team building, and cost containment. Organizing the book around the new resource-driven management model rather than the goal-driven management model makes this book unique and distinguishes it from other management texts.

The Nurse Manager's Guide to Budgeting & Finance, Third Edition Al Rundio, 2021-06-15 Nurses focus on the art and science of caregiving but nurse managers are faced with the economic reality of patient staffing ratios, budgets, reports, and accounting. Acronyms such as FTEs and ADCs can feel like a foreign language but thankfully help is available. Updated to include details about key legislation that affects budgeting, *The Nurse Manager's Guide to Budgeting and Finance 3rd Edition* provides practical tools, tips, and strategies for running a unit that were not taught in nursing school. Operating and capital budget development and planning for the year, formulas and calculations for full-time employee hours, variances, and benefit costs. Explanation of financial statements, budgets, and reimbursement documents. The relationship between high-reliability organizations (HROs) and finance budgets. Differences between not-for-profit and for-profit institutions. What a great reference, complete yet concise. For those nurses who don't think the budget is important, Rundio identifies the relationship between informed budgeting and improved patient care. No nurse should be without a copy.

William J. Lorman, PhD, JD, MSN, PMHNP, BC, NCPsychA, FAAN, Principal, Insight Psychological Services, Willow Grove, Pennsylvania. This book is essential reading for all advanced practice registered nurse educators and policymakers. Concepts central to healthcare costs, reimbursement, and national policy are presented in a way that is easy for the non-manager to understand. It's not easy to make budgeting interesting, but Dr. Rundio does it.

Sally K. Miller, PhD, APRN, FAANP, Clinical Professor, Drexel University College of Nursing and Health Professions.
