Please write answers in your journal

1. As the opening credits roll, the letters A, T, C and G get highlighted in people's names. Describe the significance of these letters.
2. Write the complimentary strand of DNA nucleotide bases for a segment of DNA with nucleotide base sequence: GATTACA.
3. What is the significance of the spiral staircase in Jerome and Vincent's home?
4. Health benefits provided by employers and health insurance companies help pay for their employees' care if they become ill. Explain how a gene test could be *used against* a prospective employee or someone applying for insurance. How were Vincent's genes used against him in the movie?
5. DNA for genetic testing can be collected from a small amount of blood, hair, saliva, and other body fluids. During a party scene in GATTACA, a woman submits a saliva sample from a recent kiss to screen her potential boyfriend/husband's DNA. Do you think that she was violating his rights by doing this without his knowledge, or is she just protecting herself from choosing an unsuitable partner?
6. How much would a DNA test reveal about someone's personality and intelligence?
7. We witnessed Vincent's parents visiting a doctor who specialized in child conception to select for the best traits for his future brother. The parents hoped that his brother would have the best possible chances for a successful life. Some of the traits mentioned in GATTACA included any possibility of inherited diseases, height, and perhaps intelligence. If you and your partner decide to have a child one day and are given the opportunity to select for special traits, would you do so? Why or why not?
8. What extreme measures is Vincent willing to undertake to achieve his dreams?
9. Discuss the real Jerome "Eugene" Morrow. How is his relationship with Vincent symbiotic? In what ways is perfection both a burden and a curse?
10. A *cautionary tale* attempts to warn the viewer about the flaws of an individual or society. What warning is the film attempting to raise? How does the film do this?

The Human Genome Project in College Curriculum Aine Donovan, Ronald Michael Green, 2008 Begun formally in 1990 the U S Human Genome Project s HGP goals were to identify all the 20 000 to 25 000 genes in human DNA determine the sequences of the three billion chemical base pairs that make up human DNA store this information in databases improve tools for data analysis and transfer related technologies to the private sector It was the first large scientific undertaking to address potential issues that arose from project data and opened up vast possibilities for the use of genetic data and the alteration of our genetic makeup This volume is the first to address the diverse range of ethical issues arising from the HGP and enables professors to bring this critically important topic to life in the classroom

Discovery Ricki Lewis, 2009-05-11 The goal of Discovery Science as a Window to the World is to relay the excitement of

science by exploring selected topics in biology and medicine in a way that reveals the process of discovery. Each chapter will focus on the curiosity and creativity that drives scientists to wonder, observe, question, and experiment. One impetus for this project is the recognition of a growing demand among instructors for a book that departs from fact-stuffed textbooks and instead engages students in the discovery process at a personal level. Emphasizes the process of discovery through interviews and key experiments. Written by a best-selling author. Provides an in-depth conversational look at the science behind several hot topics in biology. Each chapter traces the beginnings of the field with stories of how serendipity and scientific inquiry intertwine. Presents the background to a field by including the scientific literature so the reader does not have to do a literature search or plow through a review article. Many essays introduce the work of overlooked scientists or unsung heroes: Alexey Olovnikov, telomeres, Leroy Steven, stem cells, to name a few. Also, well-known scientists are interviewed: Stanley Miller, Carl Woese, John Gearhart, and others. The essays show how ideas interact and coalesce from different lines of research. Highlights the role of the media in interpreting science for the public.

The Failure of Evangelical Mental Health Care John Weaver, 2014-11-26. In the evangelical community, a variety of alternative mental health treatments—deliverance, exorcism, biblical counseling, reparative therapy, and many others—have been proposed for the treatment of mentally ill, female, and LGBT evangelicals. This book traces the history of these methods, focusing on the major proponents of each therapeutic system while also examining mainstream evangelical psychology. The author concludes that in the majority of cases, mental disorders are blamed on two main issues: sin and demonic possession/oppression, and that as a result, some communities have become a mental health underclass who are ill-served or oppressed by both alternative and mainstream evangelical therapeutic systems. He argues that the only recourse left for mentally ill, female, and LGBT evangelicals is to rally for reform and increased accountability for both professional and alternative evangelical practitioners.

Science John Michels (Journalist), 2009. **Nature** Noel Castree, 2005-11-17. Exploring the shifting ways in which geographers have studied nature, this book emphasizes the relationships and differences between human geography, physical geography, and resource and hazards geography. The first to consider the topic of nature in modern geography as a whole, this distinctive text looks at all its major meanings, from the human body and psyche through to the non-human world, and develops the argument that student readers should abandon the idea of knowing what nature is in favour of a close scrutiny of what agendas lie behind competing conceptions of it. It deals with, amongst others, the following areas: the idea of nature, the nature of geography, de-naturalization and re-naturalization after nature. As everything from global warming to GM foods becomes headline news, the use and abuse of nature is on the agenda as never before. Synthesizing a wealth of diverse and complex information, this text makes the significant theories, debates, and information on nature accessible to students of geography, environmental studies, sociology, and cultural studies.

Gender, Race, and American Science Fiction Jason Haslam, 2015-05-08. This book focuses on the interplay of gender, race, and their representation in American science fiction from the nineteenth century through to

the twenty first and across a number of forms including literature and film Haslam explores the reasons why SF provides such a rich medium for both the preservation of and challenges to dominant mythologies of gender and race Defining SF linguistically and culturally the study argues that this mode is not only able to illuminate the cultural and social histories of gender and race but so too can it intervene in those histories and highlight the ruptures present within them The volume moves between material history and the linguistic nature of SF fantasies from the specifics of race and gender at different points in American history to larger analyses of the socio cultural functions of such identity categories SF has already become central to discussions of humanity in the global capitalist age and is increasingly the focus of feminist and critical race studies in combining these earlier approaches this book goes further to demonstrate why SF must become central to our discussions of identity writ large of the possibilities and failings of the human past present and future Focusing on the interplay of whiteness and its various others in relation to competing gender constructs chapters analyze works by Nathaniel Hawthorne Mary E Bradley Lane Edgar Rice Burroughs Philip Francis Nowlan George S Schuyler and the Wachowskis Frank Herbert William Gibson and Octavia Butler Academics and students interested in the study of Science Fiction American literature and culture and Whiteness Studies as well as those engaged in critical gender and race studies will find this volume invaluable
