Curriculum Development and Evaluation, 2024-12-30 Much has been written about successful curricula for of the fourth Fifth Industrial Revolution 4 5IR The written work has been dominated by a contestation between content driven approaches professional needs and outcomes driven approaches societal needs The contestation between these approaches misses the production of conclusive curriculum components that underpin a successful digitalised curriculum for of the 4 5IR The contestation further misses a pragmatic curriculum which is capable of addressing individual unique needs As such this book concentrates on curriculum components that underpin a successful digitalised curriculum for of the 4 5IR It further discusses curriculum components for of a pragmatic curriculum that harmonises between the two dominating approaches Contributors are Bongani Boy Dlamini Reuben S Dlamini Terrie Jwan Sella Simon Bhekumuzi Khoza Dumisa C Mabuza Makhulu A Makumane Dumsani W Mncube Cedric Bheki Mpungose Sandile Ngcobo Makhosazana E Shoba and Lerato Hlengiwe Sokhulu

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can

have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

Learning Progressions in Geography Education Osvaldo Muñoz Solari, Michael Solem, Richard Boehm, 2016-07-30 This book informs an international audience of teachers scholars and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world The book represents an important contribution to learning progressions research and practice The different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning

of geography The book compares educational systems and how teachers and curriculum developers use the concept of learning progression to guide educational practices As an approach to educational research learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards The book analyzes the general conditions of learning progressions within the context of a globalized world Important themes are addressed such as knowledge acquisition in formal education measuring learning progressions in informal settings learning progressions for one curriculum standard or several standards conditions to assess progression in the learning of facts concepts and skills and multiple pathways for understanding or learning geography The contributing authors are experienced scientists in the field from all around the world giving specific insights into the practices of their countries The book appeals to K 12 teachers school administrators policymakers researchers in geography education professors and lecturers at universities around the world *Public Documents of Massachusetts* Massachusetts,1886

Innovations in online teaching and learning Judah P. Makonye,Nokulunga S. Ndlovu,2023-03-01 This book s research is on online pedagogical approaches devised by teacher educators and researchers to circumvent a face to face curriculum delivery during the COVID 19 pandemic The challenge faced by educators was that they were uncertain of how to use digital technologies in teaching learning and assessment productively This book reports on case studies on teaching student teachers with technology in a way that advanced not only communication but also the cognitive growth of students in relation to disciplinary knowledge The scholars from South African universities used both conceptual and empirical methodologies mostly in qualitative set ups The scholarly contributions in this book are varied They cover theoretical nuances for ICT use in education considerations for the use of computers in the classroom pedagogical thinking and pedagogical integration of ICTs in education affordances of iPads in visible teaching and learning supporting student cognition in Languages Mathematics Science Engineering Graphics and Design with ICTs The use of software applications such as GeoGebra and Excel in teaching and learning mathematics is researched among others The rich discussions that emerged from their research enable academics to learn from others innovative moments that came as a result of pandemic pressure The recommendations in this book can be used in blended learning beyond the COVID 19 era as curriculum delivery methods are bound to change The value of this book is that it reports on pedagogical innovations in using digital technologies in teacher education Researchers have an opportunity to learn from this book how to deal with the tantalising teaching and learning problem of our time How can the use of digital technology transform teaching and learning in general and teacher education in particular
