pistolaire 1850 1900 genre et pratique culturelle is a study of private letters by eight Nineteenth Century French authors Flaubert Zola Sand Baudelaire Maupassant Eberhardt Bashkirtseff and Edmond de Goncourt during the period of 1850 to 1900 Through in depth analyses of these intriguing documents the book demonstrates that personal correspondences cast fresh light on the concept of intimacy in Nineteenth Century French culture Since epistolary writing implies a necessary exchange between lived experience and the written word the book s intention is also to interpret letter practice as a specific textual form with its own generic expectations and constraints which are distinct from other life writing genres such as the diary the autobiography and the memoir Divided into five chapters the study begins with a short introduction to the culture of individuality The four subsequent chapters explore the poetics of epistolary writing including significant topics the various roles of the letter writer epistolary pacts and the problem of the signature Addressing a wide range of epistolary situations including daily life health money problems love travel and even suicide notes the book also offers new critical perspectives on six of the most interesting manuscript letters that have been chosen from the examined sources

Contemporary Philosophical Debates on Values Yvanka Raynova,2025-08-26 The following special issue is dedicated to the 20th anniversary of the founding of the Institute for Axiological Research and its journal Labyrinth The title Current philosophical debates on values may seem very broad at first sight However the goal here is not to present and discuss all or

even the most important contemporary debates on values but only a few that are at the core of contemporary philosophy The provided essays deal with values in various contexts such as human and women rights emancipation morality etc While they do not claim to provide definitive answers to the posed questions they offer new perspectives and interpretations that can inspire new research on the relationships between values fundamental rights norms and emotions *Studia patristica*, 1966

Logos of Phenomenology and Phenomenology of the Logos. Book One Anna-Teresa Tymieniecka, 2006-06-30 During its century long unfolding spreading in numerous directions Husserlian phenomenology while loosening inner articulations has nevertheless maintained a somewhat consistent profile As we see in this collection the numerous conceptions and theories advanced in the various phases of reinterpretations have remained identifiable with phenomenology What conveys this consistency in virtue of which innumerable types of inquiry scientific social artistic literary may consider themselves phenomenological Is it not the quintessence of the phenomenological quest namely our seeking to reach the very foundations of reality at all its constitutive levels by pursuing its logos Inquiring into the logos of the phenomenological quest we discover indeed all the main constitutive spheres of reality and of the human subject involved in it and concurrently the logos itself comes to light in the radiation of its force Tymieniecka **Leibniz** Maria Rosa

Antognazza,2008-10-06 Of all the thinkers of the century of genius that inaugurated modern philosophy none lived an intellectual life more rich and varied than Gottfried Wilhelm Leibniz 1646 1716 Maria Rosa Antognazza's pioneering biography provides a unified portrait of this unique thinker and the world from which he came At the centre of the huge range of Leibniz's apparently miscellaneous endeavours Antognazza reveals a single master project lending unity to his extraordinarily multifaceted life's work Throughout the vicissitudes of his long life Leibniz tenaciously pursued the dream of a systematic reform and advancement of all the sciences As well as tracing the threads of continuity that bound these theoretical and practical activities to this all embracing plan this illuminating study also traces these threads back into the intellectual traditions of the Holy Roman Empire in which Leibniz lived and throughout the broader intellectual networks that linked him to patrons in countries as distant as Russia and to correspondents as far afield as China

Negative Knowledge

Sebastian Hüsch,Isabelle Koch,Philipp Thomas,2020-08-10 The advent of Modernity was accompanied by a radical criticism of traditional metaphysics In particular since the 20th century rationality is predominantly conceived of as positivistic and scientific reducing reality to what is positively knowable The price to pay is the cutting out of any kind of phenomenon of negativity The present volume explicitly explores the philosophical and epistemological potential of negativity The contributions brought together in this book tackle the question of negativity from historical as well as from systematical perspectives From different angles they defend the claim that philosophical approaches recurring to negativity can build a non reductive conceptualization of rationality and thus offer a valuable contribution to the orientation of humankind in the 20th and 21st century This volume contains contributions in English French and German

Philon D'Alexandrie Jean Danielou,2009-07-02 Philo of Alexandria according to Cardinal Danielou represents the first attempt to correct Greek philosophical thought with biblical revelation Philo was a faithful Jew who studiously avoided syncretism with pagan religion biblical worship could only be radically monotheistic But Philo represents more than a spiritual master he inaugurated Judeo Christian philosophy itself But even here Philo avoided syncretism with Platonism and remained highly orthodox Modifying Greek philosophy at the points where it conflicted with biblical revelation Philo built the fundamentals of a Judeo Christian way of looking at the world that would have a profound influence for centuries to come
