

La Lumière

La lumière n'est qu'un petit domaine du spectre électromagnétique. Les rayons gamma, les rayons X, les ultra-violet, la lumière, les infrarouges, les micro-ondes et les ondes radio sont une seule et même chose: l'onde électromagnétique.

Le spectre des ondes électromagnétiques

Nous pouvons définir toute onde électromagnétique comme étant l'oscillation, sur deux plans perpendiculaires, d'un **champ électrique** et d'un **champ magnétique** qui se propagent ensemble à la vitesse dite de la lumière. Les propriétés ondulatoires ne font appel à aucun support matériel et nous ne pouvons donc pas encore parler du corpuscule nommé **photon**. Ce qui différencie tel ou tel domaine du **spectre électromagnétique** est la **fréquence d'oscillation** des deux champs magnétique et électrique. Nous entendons plus couramment parler de **longueur d'onde** qui est simplement le rapport de la vitesse de la lumière sur cette fréquence d'oscillation. La **vitesse de la lumière**, et donc la vitesse de toute onde électromagnétique, dans le vide, est une constante universelle. En revanche, dans un milieu matériel, la vitesse de l'onde est inférieure à cette constante et dépend des caractéristiques physiques de la matière traversée.

La lumière, seule domaine visible par l'œil humain, est un spectre allant du violet, 380nm, au rouge profond, 780nm. L'émission de la totalité du spectre donne une impression de lumière blanche. Une lumière colorée présente simplement une forte proportion d'onde d'une partie restreinte du spectre visible. Par exemple, une lumière est rouge simplement parce qu'il y a beaucoup d'onde autour de 680 nm. A l'extrême, une lumière peut être **monochromatique** lorsqu'elle est constituée uniquement d'ondes de fréquence unique. La quantité du flux de lumière est définie par le mot **intensité**. L'étude spectrale de la lumière consiste à mesurer la contribution de chaque longueur d'onde dans l'intensité totale.

Il est important de dire ici que les **couleurs primaires** rouge, vert et bleu ne sont pas

La Lumiegrave Qui Seacuteteint
