

# Computer Basics

## Quick Reference Card

### General Concepts

**Understanding Hardware, Software, and Information Technology (IT):** A computer's hardware is a computer item you can physically see or touch. The software is a computer program that tells computer hardware how to operate. **Information Technology (IT)**, is the broad subject related to computers and managing and processing information.

### Main Parts of a Personal Computer

**Central Processing Unit (CPU):** The computer's brain or heart, the CPU is a computer's main chip. It calculates and processes information, and its speed is measured in Megahertz (MHz) and Gigahertz (GHz).

**Hard Disk:** The computer's main, long-term storage device.

#### Common Input Devices:

**Mouse:** Acts as a handheld pointing device and controls the actions of that blinking item on your computer screen known as a cursor.

**Keyboard:** Lets you enter information and commands into a computer.

**Digital camera:** Lets you take pictures and transfer them to a computer.

#### Common Output Devices:

**Monitors:** Looks and works a lot like a TV screen. The monitor is really only half of what makes text and images appear on the screen. The other half is the graphics card. The monitor plugs into the graphics card in the back of the computer.

**Printers:** Transfers processed information to printed page. Main types of printers are: InkJet, Laser and color laser, Multifunction, Dot matrix, and Plotter.

**Speakers:** Allow you to hear the sounds produced by the sound card.

**Memory:** A computer's temporary storage place, where it gets its work done. There are two main types of memory on your computer:

**RAM (random-access memory):** Computer's main memory, which is used to process information (example: work with a file). This memory is volatile, which means unsaved data disappears when you shut off the computer.

**ROM (read-only memory):** Computer's low-level memory, which is used to perform its most basic functions (example: start the computer). This memory is nonvolatile, which means data remains even when you shut off the computer.

#### Measuring Memory:

**Bit:** Short for binary digit, a bit is the smallest memory unit. Eight bits equal one byte.

**Byte:** Short for binary digits eight, one byte equals one character (letter, number, or symbol).

**Kilobyte (K or KB):** 1,024 bytes

**Megabyte (M or MB):** 1,048,576 bytes

**Gigabyte (G or GB):** 1,073,741,824 bytes

**Terabyte (TB):** 1,099, 511,627, 776 bytes

### Computer Performance

**CPU Speed:** Arguably the single most important factor that determines a computer's performance is the speed of its CPU.

**RAM:** Generally, the more RAM a computer has the better its performance.

**Multitasking:** Microsoft Windows can run more than one program at a time. The more programs or tasks being done at a time, the longer it takes to complete each one, and hence a drop in computer performance.

### Software

**Graphical User Interface (GUI):** Makes computers easier to operate by using pictures and icons to represent files and programs.

**An Operating System:** Loads automatically and controls just about everything on your computer.

**An Application Program:** Helps you accomplish a certain task, such as writing a letter, browsing the Internet, or playing a game.

**New Software Versions and Releases:** Come out periodically and add new features and improve components of a program. New versions also take advantage of ever-improving technology.

### Networks and the Internet

**LAN:** Stands for Local Area Network and connects computers in the same geographic area or building, using cables.

**Internet:** The Internet is the largest computer network in the world, connecting millions of computers. People use it for many reasons, such as to make purchases, research information, or send e-mail.

**World Wide Web:** The World Wide Web is a hypertext system that operates over the Internet. The hypertext is read by browsers, which display the web pages from web servers.

### Storage Devices

**Memory Devices:** Memory devices are very useful for sharing or transporting information. They are also useful for backing up your information. A comparison of some of the most common storage devices appears below.

| Device             | Speed                                                                                         | Capacity                                                                        | Cost                                                           |
|--------------------|-----------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|----------------------------------------------------------------|
| Zip disk           | Significantly slower than most hard disks.                                                    | 100 to 250 Megabytes (MB).                                                      | Expensive when compared to costs of other storage devices.     |
| CD-ROM             | Much slower than a hard disk.                                                                 | About 650 Megabytes (MB).                                                       | Very inexpensive.                                              |
| DVD                | Faster than a CD-ROM drive, but not as fast as a hard disk.                                   | About 4 Gigabytes (GB), although future DVDs are rumored to hold up to 17 (GB). | Slightly more than a CD-ROM but still very inexpensive.        |
| Internal Hard Disk | Very fast. Most hard disks have an average access speed of between 8 to 15 milliseconds (ms). | Enormous. Many hard disks have more than 200 Gigabytes (GB) of storage.         | Byte for byte they are the most inexpensive way to store data. |
| External Hard Disk | Very fast, though normally slower than internal hard disks.                                   | Enormous – same as internal hard disks.                                         | Slightly more expensive than internal hard disks.              |
