Cumiskey, Larissa Hjorth, 2013-08-29 As an example of convergence the mobile phone especially in the form of smartphone is now ushering in new promises of seamlessness between engagement with technology and everyday common experiences This seamlessness is not only about how one transitions between the worlds of the device and the physical environment but it also captures the transition and convergences between devices as well i.e. laptop to smartphone smartphone to tablet This volume argues however that these transitions are far from seamless We see divisions between online and offline virtual and actual here and there taking on different cartographies emergent forms of seams It is these seams that this volume acknowledges challenges and explores socially culturally technologically and historically as we move to a deeper understanding of the role and impact of mobile communication's saturation throughout the world
