**Structural Integrity** E.S. Folias,2012-12-06 It is propitious that the 25th year of publication of the International Journal of Fracture should coincide with the opportunity to support the recognition by the Society of Engineering Science of the 65th birthday of the Founding Editor in Chief Professor M L Williams At its 24th Annual Meeting at the University of Utah in September 1987 the Organizing Committee of the Society chose to honor Professor Williams by reserving several sessions for contributions from his colleagues working in the mechanics of fracture and associated mechanical property structure relationships We are therefore pleased to welcome Professor E S Folias Professor of Mechanical Engineering University of Utah and a member of the Editorial Committee as the Guest Editor for the first three issues of Volume 39 of the Journal We have also noted that the University of Utah was one of the three homes for the Journal sandwiched between the original home at the California Institute of Technology in 1965 and its current location at the University of Pittsburgh In observing these dual anniversaries the publishers not only enthusiastically support the presentation of these special papers but also wish to extend to Professor Williams our own best wishes on his personal anniversary and to thank him and all the authors reviewers and particularly M e Williams J L Swedlow and the Regional Editors for their respective contributions as we observe this 25th milestone

**Sandwich Structures 7: Advancing with Sandwich Structures and Materials** O.T. Thomsen,E. Bozhevolnaya,A. Lyckegaard,2006-01-16 Sandwich structures represent a special form of a laminated composite material or structural elements where a relatively thick lightweight and compliant core material separates thin stiff and strong face sheets The faces are usually made of laminated polymeric based composite materials and typically the core can be a honeycomb type material a polymeric foam or balsa wood The faces and the core are joined by adhesive bonding which ensures the load transfer between the sandwich constituent parts The result is a special laminate with very high bending stiffness and strength to weight ratios Sandwich structures are being used successfully for a variety of applications such as spacecraft aircraft train and car structures wind turbine blades boat ship superstructures boat ship hulls and many others The overall objective of the 7th International Conference on Sandwich Structures ICSS 7 is to provide a forum for the presentation and discussion of the latest research and technology on all aspects of sandwich structures and materials spanning the entire spectrum of research to applications in all the fields listed above
