Maurice Gibbons, 2003-02-03 The Self Directed Learning Handbook offers teachers and principals an innovative program for  
customizing schooling to the learning needs of individual students and for motivating them to take increasing responsibility  
for deciding what and how they should learn Whether the students are struggling or proficient the program is designed to  
nurture their natural passion for learning and mastery challenging them to go beyond the easy and familiar so they can truly  
excel The program can be introduced in stages in any middle or high school classroom and enables students of diverse  
abilities to design and pursue independent course work special projects or even artistic presentations community field work  
or apprenticeships Using this approach the students take on an increasingly autonomous self directed role as they progress  
The heart of the program is the action contract or learning agreement whereby the student sets challenging yet attainable  
goals commits to a path for achieving them and evaluates the results Special emphasis is placed on developing skills and
