 Ileana Chinnici offers an account of the life of the Jesuit scientist Angelo Secchi 1818 1878 In addition to providing an
 invaluable account of Secchi s life and work something that has been sorely lacking in the English language scholarship this
 biography will be especially stimulating for those interested in the evolution of astrophysics as a discipline from the
 nineteenth century onward Despite his eclecticism reminiscent of the natural philosophers of the seventeenth and eighteenth
 centuries Secchi was in many ways a very modern scientist open to innovation and cooperation and a promoter of
 popularization and citizen science Secchi also appears fully inserted in the cultural context of his time he participated in
 philosophical and scientific debates spread new theories and ideas but also suffered the consequences of political events that
 marked those years and impacted on his life and activities Carte du ciel , **Catalogue of Scientific Papers**
