1.1 Equipment Capabilities

GE is pleased to offer the LM6000 Aeroderivative Package. With the ability to deliver over 49 MW on a gross electrical basis, the LM6000 maintains the proven reliable technology with modern design enhancements to improve maintainability and reliability. Additional benefits of the LM6000 Package are the lower overall installed cost, shorten installation time, reduced customer interfaces and enhanced safety.

The Package features the GE LM6000 gas turbine and a matching electric generator. It is designed for simple-cycle, combined-cycle, and cogeneration installations. The LM6000 is built with rugged components for base-load utility service. It can also start and stop easily for "peaking" or "dispatched" applications. Additionally, quick dispatchability is available in simple-cycle applications with the 10-minute fast start feature.
