## ENGAGING HANDS ON ACTIVITIES

### GALAXIES

#### MILKY WAY GALAXY

Our Sun is like one tiny dot among many other dots in space called the Milky Way. The Milky Way is just one of billions of neighborhoods in space, and each neighborhood is like a giant family of stars, dust, and gas. They stick together because of gravity. These space neighborhoods can be big or small. Some are like little neighborhoods with around 100 million stars, while others are super huge with more than a trillion stars!

A galaxy has a big ball of stars in the center called the nucleus. It has a big ball of stars in the center called the nucleus. It has a big ball of stars in the center called the nucleus.

#### TYPES OF GALAXIES

Some galaxies are small (dwarf galaxies) and have around 100 million stars, while others are huge and have more than a trillion stars! The scientists who study space, called astronomers, put these galaxies into three groups:

- **SPIRAL** - A SWIRLING SPIRAL KIND OF LIKE OUR MILKY WAY
- **ELLIPTICAL** - A STRETCHED-OUT CIRCLE
- **IRREGULAR** - DOESN'T HAVE A REGULAR SHAPE AT ALL

**The Impact of HST on European Astronomy** F. Duccio Macchetto, 2010-01-14 Remembrance of Things Past It scarcely seems credible that it was almost exactly thirty years ago that I first met Duccio Macchetto at the first meeting of the newly formed Science Working Group of what was then called the Space Telescope project We were there in slightly different roles Duccio as the project scientist for the Faint Object Camera and I as an interdisciplinary scientist Henk van de Hulst was also there as the official representative of ESO The approval of the project was the end result of a great deal of lobbying and politicking both in the USA and Europe the European contribution proving essential to the approval process in the USA Those interested in the gritty of the process should read Robert Smith's outstanding history of the Hubble Space Telescope We should have realized early on that we were in for a rough time At that first meeting of the Science Working Group I remember vividly NASA Headquarters telling us that the Space Telescope was a success oriented programme that would cost M 680 Well we could live with the cost tag but we should have had concerns about the expression success oriented This meant that everything should turn out exactly

as planned the project would be carried out within the projected time scale and budget and the telescope would be launched in 1983 Well the rest is history We learned a lot of useful jargon along the way     *Harcourt Science: Earth science, [grade] 5, Units C and D, teacher's ed* ,2000     1,000 Facts About Space Dean Regas,2022-12-06 Full of fascinating facts on space exploration our solar system and beyond this comprehensive book from astronomer Dean Regas takes you on a mind blowing tour of our universe     National Geographic Kids Ultimate Space Atlas Carolyn Cinami DeCristofano,2017 This atlas takes readers through maps of the solar system the Milky Way and deep space giving them a close look at and locations of planets supernovas and other universes Sky maps will help kids spot these objects in the night sky and maps of planets and our solar system give the kind of detail that National Geographic is known for Amazon com     **Galaxy Formation and Evolution** Houjun Mo, Frank van den Bosch, Simon White,2010-05-20 A coherent introduction for researchers in astronomy particle physics and cosmology on the formation and evolution of galaxies     *Galaxy Formation and Evolution* Mr. Rohit Manglik,2023-07-23 Studies the origin structure dynamics and evolution of galaxies addressing star formation galaxy interactions and cosmic evolution
