

Conquer Verb-Tense Consistency

A verb's tense indicates when the action that it describes takes place—in the past (I ran), in the present (I run), or in the future (I will run).

The verb tense you use should remain consistent, or the same, unless you have a good reason to change it. The verb tense should remain consistent throughout sentences, throughout paragraphs, and throughout the entire body of whatever you are writing—again, unless you have a good reason to change it. For example:

Incorrect: When my mom **goes** to the store, she **bought** a treat for everyone.
(Goes is in the present tense, and bought is in the past tense—and you don't have a good reason to change the tense you are using.)

Correct Option 1: When my mom **goes** to the store, she **buys** a treat for everyone.
(Both verbs are in the present tense.)

Correct Option 2: When my mom **went** to the store, she **bought** a treat for everyone.
(Both verbs are in the past tense.)

So what IS a good reason to change the verb tense you are using? When you are describing events that happen at different times. For example:

Corrects: Lindsey **plays** field hockey now, but last year she **was** on the soccer team.
(You are describing something that is happening now, and you are also describing something that happened in the past.)

Corrects: We **took** first place in the state competition; next week we **will compete** in the national competition. (You are describing something that happened in the past, and you are also describing something that will happen in the future.)

Directions: In each group of sentences or paragraphs below, place a ✓ in front of the sentence or paragraph that correctly uses verb tenses.

1. a _____ I picked up the cell phone quickly and dial the number.
b _____ I pick up the cell phone quickly and-dialed the number.
c _____ I picked up the cell phone quickly and dialed the number.
2. a _____ Suddenly, the lights flickered and an unsinvited guest enters the room.
b _____ Suddenly, the lights flicker and an unsinvited guest enters the room.
c _____ Suddenly, the lights flicker and an unsinvited guest entered the room.
3. a _____ When I was comfortable, I began my homework.
b _____ When I was comfortable, I begin my homework.
c _____ When I am comfortable, I began my homework.
4. a _____ Stephens is going to save his money so that he will be able to buy a drum set.
b _____ Stephens is going to save his money so that he was able to buy a drum set.
c _____ Stephens saves his money so that he was able to buy a drum set.

Lazy Editor Answers October 2014:

Literary Publishing in the Twenty-First Century Travis Kurowski, Wayne Miller, Kevin Prufer, 2016-04-12 Gutenberg's invention of movable type in the fifteenth century introduced an era of mass communication that permanently altered the structure of society. While publishing has been buffeted by persistent upheaval and transformation ever since, the current combination of technological developments, market pressures, and changing reading habits has led to an unprecedented paradigm shift in the world of books. Bringing together a wide range of perspectives, industry veterans and provocateurs, writers, editors, and digital mavericks, this invaluable collection reflects on the current situation of literary publishing and provides a road map for the shifting geography of its future. How do editors and publishers adapt to this rapidly changing world? How are vibrant public communities in the Digital Age created and engaged? How can an industry traditionally dominated by white men become more diverse and inclusive? Mindful of the stakes of the ongoing transformation, *Literary Publishing in the 21st Century* goes beyond the usual discussion of print vs. digital to uncover the complex, contradictory, and increasingly vibrant personalities that will define the future of the book.

Declarative Logic Programming Michael Kifer, Yanhong Annie Liu, 2018-09-19 The idea of this book grew out of a symposium that was held at Stony Brook in September 2012 in celebration of David S. Warren's fundamental contributions to Computer Science and the area of Logic Programming. In particular, Logic Programming (LP) is at the nexus of Knowledge Representation, Artificial Intelligence, Mathematical Logic, Databases, and Programming Languages. It is fascinating and intellectually stimulating due to the fundamental interplay among theory, systems, and applications brought about by logic. Logic programs are more declarative in the sense that they strive to be logical specifications of what to do rather than how to do it, and thus they are high level and easier to understand and maintain. Yet, without being given an actual algorithm, LP systems implement the logical specifications automatically. Several books cover the basics of LP but focus mostly on the Prolog language with its incomplete control strategy and non-logical features. At the same time, there is generally a lack of accessible yet comprehensive collections of articles covering the key aspects in declarative LP. These aspects include, among others, well-founded vs. stable model semantics, for negation, constraints, object-oriented LP, updates, probabilistic LP, and evaluation methods including top-down vs. bottom-up and tabling. For systems, the situation is even less satisfactory, lacking accessible literature that can help train the new crop of developers, practitioners, and researchers. There are a few guides on Warren's Abstract Machine (WAM), which underlies most implementations of Prolog, but very little exists on what is needed for constructing a state-of-the-art declarative LP inference engine. Contrast this with the literature on, say, Compilers, where one can first study a book on the general principles and algorithms and then dive in the particulars of a specific compiler. Such resources greatly facilitate the ability to start making meaningful contributions quickly. There is also a dearth of articles about systems that support truly declarative languages, especially those that tie into first-order logic, mathematical programming, and constraint solving. LP

helps solve challenging problems in a wide range of application areas but in depth analysis of their connection with LP language abstractions and LP implementation methods is lacking Also rare are surveys of challenging application areas of LP such as Bioinformatics Natural Language Processing Verification and Planning The goal of this book is to help fill in the previously mentioned void in the LP literature It offers a number of overviews on key aspects of LP that are suitable for researchers and practitioners as well as graduate students The following chapters in theory systems and applications of LP are included

The Professional Standards of Executive Remuneration Consultants Calvin Jackson,2023-05-01 Love them or hate them executive remuneration consultants are key players in remuneration committees pay determination processes This book concerns the professional standards of executive remuneration consultants and their in house counterparts for example Human Resources Director and Head of Reward in providing remuneration committee advisory services The author is a 25 year veteran executive remuneration consultant having worked around the world in this capacity particularly in the financial services sector This book is based on a qualitative empirical doctoral research exercise involving 53 participants in the UK executive pay scene including regulators institutional shareholder bodies proxy advisors remuneration committees chairs members executive remuneration consultants and in house executive reward specialists The objective was to formulate conclusions that could be used to the benefit of UK practice and contribute to the relevant academic scholarship on executive remuneration consultants The research covered 18 aspects ranging from an examination of the independence of such consultants to whether there might be a specialised accreditation qualification and or licence to practise regime covering their services It provides novel insights into this previously under researched area of corporate governance financial regulation This book will be of interest to those involved in the UK executive remuneration scene whether government regulators or any of the other parties mentioned already plus academics in universities and business schools It is hoped too that overseas remuneration regimes that have respects in common with the UK s will find this book useful

Public Discourses and Attitudes in Greece during the Crisis Dimitris Katsikas,2019-11-21 This book presents the findings of new empirical research regarding shifts in public discourses and attitudes in Greek society as a result of the crisis These findings have shown different shades of Euroscepticism and anti German sentiments but they have also revealed a normative conflict within Greek society itself The book shows how economic crises and strict policy conditionality causing or deepening economic recession in the countries receiving it has the potential to set in motion a fragmentation process which transcends standard material stratification and relates to broader political and even cultural rifts among the population With this the book serves as a case study of the impact of wider pressures and shifts weighing upon the European Union EU and the way European societies perceive the integration process This text will be of key interest to scholars and students of EU politics Greek and Southern European studies and more broadly to cultural and comparative politics and political economy and European politics
