Lab Manual, 2022-12-28 This Book contains the manuals for Microwave Engineering Laboratory and Mobile Communication System Laboratory The purpose of laboratory activities is to familiarize students with setting up microwave benches and working with rectangular waveguides also to identify distinct microwave components properties and measure wave parameters including impedance frequency wavelength and power After finishing this lab course students will be able to use microwave equipment comprehend microwave measurements and examine the properties of microwave components The goals of the Mobile Communication System Laboratory are to comprehend the interdependence of cellular system design parameters investigate orthogonality conditions for CDMA systems classify different types of propagation models and analyse the link budget and comprehend the working principles of OFDM MIMO and cognitive radio Outcomes will be able to demonstrate the effect of cellular system design parameters on system capacity and quality of service compare and contrast trunking radio systems examine the effect of small scale fading parameters on radio channel performance and describe the features of OFDM MIMO and cognitive radio

Microwave Engineering Laboratory Manual James Wagle, 2012-04-25 This text intends to supplement Dr Wagle's University of Colorado at Colorado Springs Microwave Measurements Laboratory ECE 4150 and ECE 5150 The content is written for undergraduate and graduate courses in applied microwave engineering and laboratory measurements The intent is not to replace textbooks describing electromagnetics field theory but focus upon real world applied applications experiments and measurements Therefore minimal theory will be provided within verbal course content This material is designed for students having successfully completed two undergraduate courses in electromagnetic field theory The course should expose students to equipment and techniques used in microwave experiments as well as the design of microwave circuits and microwave experiments Suitable for basic laboratory courses in electromagnetics Rules of thumb practical info Essential electromagnetic basics to perform experiments Microwave component parameters Decibel
