

Who?, What?,
When?,
Where?

April 25th, 1915. That was the day we landed on the beach in Gallipoli. We had no idea as to what was about to happen. Arriving in complete darkness just offshore and having to swim to the beach, we lost some men then. As light began to disclose our location the Turks on the hill above rained down bullets forcing us into natural trenches at the foothills.

We fought hard and managed to establish two beachheads on either side of the coast. The conditions were horrible, people getting hit or falling all around us whilst we were trying to push up. There was never any peace. It was near impossible to sleep with grenades going off so often, the constant cracking of nearby rifles and even nearby enemy mortars going off. I had never killed a person before, and I found it very difficult to do so the first time. I was running up the hill with my battalion and we were met by some Turkish troops who had no idea we were there. Our sergeant ordered us to surprise them, but I simply could not.

This provides
an insight into
the emotions
surrounding
the facts.

After many attempts at gaining control of the hill and thousands of casualties I was emotionally scarred forever. My job was to maintain the troops in the trench. I was a corporal. After many attempts at regaining the hill we decided to call in more troops from our allies, France and Britain. They brought in a combined 95,000 troops which was a huge boost to our campaign confidence and so we pushed up one more time unfortunately losing more troops than ever. With this blow we just waited in our camp for our next orders. It was quite boring, but we tried to create games and have some fun. We also received some biscuits from Australia that could last a long time so that was a nice and tasty treat. Both Turkey and our troops were stuck in a stalemate between trenches.

Eventually the commanding officers decided there was not much value left in Gallipoli and from the 5th of December 30,000 troops were evacuated for five straight nights. During the first two nights we stopped shooting, tricking the Turks into believing we were preparing for a winter defensive campaign. During this time we kept supplies coming in regularly so as to not raise suspicion. After the two days we had an ingenious idea and devised a rifle that would fire simply from water and weights. This system would fire rifles randomly as to imitate that we were still there. After 5 long nights on the 10th of December the Gallipoli Campaign was officially over. We had escaped with very little suspicion.

Conclusion
reinforces the
writer's sense
of war being
pointless.

The estimated casualties is somewhere around 9000 with a further 15,000 being injured or falling ill. With all this said it is believed that the Gallipoli Campaign had no effect on the course of the war.

research since the 1950s The importance of this research derives from the systematic analysis of functionalist theories of industrialism Functionalist theories assume that the complementary demands of efficiency and justice result in more meritocratic societies characterized by high rates of social mobility Much of the sociological evidence has cast doubt on this optimistic if not utopian claim that reform of the education system could eliminate the influence of class gender and ethnicity on academic performance and occupational destinations This book brings together sixteen cutting edge articles on education and social mobility It also includes an introductory essay offering a guide to the main issues and controversies addressed by authors from several countries This comprehensive volume makes an important contribution to our theoretical and empirical understanding of the changing relationship between origins education and destinations This timely collection is also relevant to policy makers as education and social mobility are firmly back on both national and global political agendas viewed as key to creating fairer societies and more competitive economies This book was originally published as a special issue of the British Journal of Sociology of Education

Practitioner Research for Social Work, Nursing, and the Health Professions Payam Sheikhattari,Michael T. Wright,Gillian B. Silver,Cyrilla van der Donk,Bas van Lanen,2022-02-01 An invaluable tool for health and social work students and professionals who want to improve their practice through collaborative research with patients clients and colleagues Throughout history some of the most prominent contributors to health and social sciences have been men and women comfortable with both practice and academia But today research in health related fields is increasingly conducted in specialized settings by people who are first and foremost researchers Critics bemoan this loss of practice based research

long considered a vital part of the contribution that doctors nurses public health workers and social workers can make both to their field and the communities in which they work Unfortunately the explosion of new discoveries in health related fields along with the exponential increase in the amount of knowledge being produced and the growing demands of practice have caused both the production and application of knowledge to become highly specialized and increasingly complex This has resulted in a widening gap between research and practice Recognizing the need for a guide to this type of research
