monograph presents a qualitative assessment of the performance of medium armored forces in 13 past conflicts that span the  
range of military operations The accompanying analysis is designed to help inform U S Army decisions about fielding medium  
armored forces in the future The case histories yielded three major insights First medium armored forces fare poorly against  
competent heavily armored opponents This finding will prove relevant to the U S Army s medium armored forces if their  
survivability and lethality do not live up to expectations or cannot be fully realized in battlefield conditions Second doctrinal  
and organizational steps can in certain circumstances mitigate medium armor s liabilities These steps include the  
implementation of high quality combined arms tactics down to the lowest echelons the effective application of supporting  
firepower and training for crews and junior leaders Finally the U S Army has lacked a forced entry armor capability since the  
retirement of the M551 Sheridan Neither the Stryker vehicle nor the Future Combat Systems as currently envisioned can fill  
that critical void The authors conclude that it would be prudent for the U S Army to maintain a mix of heavy medium armored  
and light forces that can be task organized and employed in conditions that best match their attributes Medium armored  
forces have much to offer in such a mix provided by publisher      **Catalog of Copyright Entries. Third Series** Library of
