Teaching Mathematics at a Technical College Zachary Youmans, 2022-11-25 Not much has been written about technical colleges especially teaching mathematics at one Much had been written about community college mathematics This book addresses this disparity Mathematics is a beautiful subject worthy to be taught at the technical college level The author sheds light on technical colleges and their importance in the higher education system Technical colleges area more affordable for students and provide many career opportunities These careers are becoming or have become as lucrative as careers requiring a four year degree The interest in technical college education is likely to continue to grow Mathematics like all other classes is a subject that needs time energy and dedication to learn For an instructor it takes many years of hard work and dedication just to be able to teach the subject Students should not be expected to learn the mathematics overnight As instructors we need to be open honest and put forth our very best to our students so that they can see that they are able to succeed in whatever is placed in front of them This book hopes to encourage such an effort A notable percentage of students who are receiving associate degrees will go through at least one of more mathematics courses These students should not be forgotten about their needs are similar to any student who is required to take a mathematics course to earn a degree This book offers insight into teaching mathematics at a technical college It is also a source for students to turn toward when they are feeling dread in taking a mathematics course Mathematics instructors want to help students succeed If they put forth their best effort and us ours we can all work as one team to get the student through the course and onto chasing their dreams Though this book focuses on teaching mathematics some chapters expand to focus on teaching in general The overall hope is the reader will be inspired by the great work that is

happening at technical colleges all around the country Technical college can be should be and is the backbone of the American working class The psychological process of stereotyping: Content, forming, internalizing, mechanisms, effects, and interventions Baoshan Zhang, Magdalena Zawisza, Fangfang Wen, Junhua Dang, Fengqing Zhao, 2023-02-06 Stereotype is a pervasive and persistent human tendency that stems from a basic cognitive need to categorize simplify and process the complex world This tendency is a precondition for social bias prejudice and discrimination Previous research has mainly focused on the content psychological mechanisms and intervention strategies of negative stereotypes as well as the stereotype threat phenomenon induced by an evaluative context where a negative in group stereotype could be confirmed However there is a lack of research examining the psychological process of forming and internalizing social stereotypes the neurocognitive mechanisms of stereotypes and the interventions including potential neurocognitive interventions addressing the consequences of negative stereotypes Furthermore as per the Behavioral Immune System BIS theory the very presence of a pathogen is likely to increase stereotyping across various social categories especially in those with a heightened perception of vulnerability to disease Thus stereotypes can be enhanced in the context of pathogen exposure such as the current outbreak of COVID 19 pandemic People exposed to the virus are more likely to suffer from personal and institutional stereotypes and discrimination which may cause negative consequences to personal and social well being Therefore in the current context of global Covid 19 pandemic it is necessary to investigate the increasing biases driven by stereotypes regarding viewing pathogens as a threat which holds across different social categories Specifically what constitutes and shapes stereotypes towards people living in epidemic areas What are the consequences of these short term shaped stereotypes What is the relationship between the consequences of these stereotypes and traditional stereotypes i e stereotypes towards race gender and age Will these short term stereotypes interact with traditional stereotypes to exacerbate discrimination or will the recategorization based on the short term stereotypes during Covid 19 pandemic allow people to ignore the traditional inferior social identity and in turn to promote social integration among different groups And how can we prevent the increasing tendency of relying on stereotypes and instead increase pro social behaviors in the Covid 19 context The current Research Topic focuses on understanding the psychological process of forming and internalizing social stereotypes the neurocognitive mechanisms of stereotypes as well as interventions including potential neurocognitive interventions regarding the consequences of negative stereotypes And we also aim to gather the latest research investigating the broad psychological process of social stereotyping with an emphasis on the implications under the Covid 19 context That is this Research Topic is also interested in the negative stereotypes specific to Covid 19 pandemic as well as relevant preventative interventions aimed at people perceived as at higher Covid 19 exposure risk Theoretical and empirical research from psychology sociology and related fields is welcome Examples of possible themes for manuscripts include but are not limited to the following topics The content of stereotypes Social categorization and discrimination based on stereotypes
