Smart Sensing and Context Daniel Roggen, Clemens Lombriser, Gerhard Tröster, Gerd Kortuem, Paul Havinga, 2008-10-15
This year marks the third edition of EuroSSC. It builds on the success of the past editions held in Enschede, The Netherlands in 2006 and in Kendal, UK in 2007. On behalf of the Organizing Committee, we would like to welcome you to EuroSSC 2008 in Zurich, Switzerland. This volume contains the invited papers and technical peer-reviewed papers selected for presentation at the conference. At EuroSSC, we aim to explore technologies, algorithms, architectures, protocols, and user aspects underlying context-aware smart surroundings, cooperating intelligent objects, and their applications. Since its inception, EuroSSC has taken a complementary technology-driven and user-driven view to discuss these aspects. It is one of the particularities of EuroSSC and the 2008 edition made no exception. In addition, we emphasized aspects related to quality of context and context-aware feedback by actuator systems. This reflects the growing importance that context processing in uncertain environments and sensor and actuator networks take in ambient intelligence environments. We received 70 paper submissions. They originate from 30 countries of Europe, the Middle East, and Africa: 66% Asia, 22% North America, 9% and South America 3%. These numbers reflect the European origins of EuroSSC but also show that EuroSSC is a recognized and attractive platform for participants from all regions of the world.
