Halyard Selection Guide:

Skipper's Mast and Rigging Guide Rene Westerhuis, 2013-04-15 The Skipper's Mast and Rigging Guide is a new title in our popular series of cockpit guides that are designed for easy reference on board in all weather conditions. Of all the elements that are hard to set up on a sailboat, gauging how mast running rigging and standing rigging should work in combination with each other is perhaps the trickiest of arts; some might call it a black art. And of course it is essential to get it right in order to stabilise the mast, reduce undue stress and consequently ensure the safety of everyone on board. This handy cockpit guide will simplify and explain to the reader exactly how to set up their mast rigging and running rigging for whatever size of yacht and with whatever rig combination. It will take the reader through the basics of setting up and adjusting their rig step by step with helpful diagrams and detailed colour photographs throughout. With this book in one hand and a spanner in the other, skippers will be able to make their own adjustments without having to call in expensive riggers.

This new edition has been completely restructured with Part 1 covering thorough preparation for a Pacific crossing and Part 2 covering Pacific weather patterns, major routes and landfall ports with useful website links throughout. There is information on construction materials and help in deciding what sort of craft would best suit your needs, including clever ways to try before you buy. Expert guidance will help you decide whether to buy a new or used yacht and both buying processes are carefully explained to ensure your investment is protected. Hidden costs are revealed and there are tips on conducting your own boat test and initial survey. Sections on registration, VAT and insurance will help you cut through the red tape.
