square brackets in the margins **The Sentient Robot** Rupert Robson, 2022-10-04 Artificial intelligence is on the point of taking humankind into a new age The turning point will come when AI has advanced so far that it matches human intelligence in every way Human intelligence whilst slower in some respects is still more flexible than AI But once AI has caught up it will take no time at all before going on to surpass humans by a huge distance That scary prospect is termed artificial superintelligence ASI Rupert Robson argues that we are now just two conceptual hurdles away from developing ASI The first of the two hurdles is to embed consciousness in AI thereby giving us the sentient robot This will enable ASI to see the world through our eyes The second of the two hurdles is about the developmental step needed in AI design so as to achieve human level flexibility in thought A new world is about to open up before us We need to understand it and prepare for it **Androids and Intelligent Networks in Early Modern Literature and Culture** Kevin LaGrandeur, 2013-01-04 Awarded a 2014 Science Fiction and Technoculture Studies Prize Honourable Mention This book explores the creation and use of artificially made humanoid servants and servant networks by fictional and non fictional scientists of the early modern period Beginning with an investigation of the roots of artificial servants humanoids and automata from earlier times LaGrandeur traces how these literary representations coincide with a surging interest in automata and experimentation and how they blend with the magical science that preceded the empirical era In the instances that this book considers the idea of the artificial factotum is connected with an emotional paradox the joy of self enhancement is counterpoised with the anxiety of self displacement that comes with distribution of agency In this way the older accounts of creating artificial slaves are accounts of modernity in the making a modernity characterized by the project of extending the self and its powers in which the vision of the extended self is fundamentally inseparable from the vision of an attenuated self This book discusses the idea that fictional artificial servants embody at once the ambitions of the scientific wizards who make them and society's perception of the dangers of those ambitions and represent the cultural fears triggered by independent experimental thinkers the type of thinkers from whom our modern cyberneticists descend *The Works of Anatole France in an English Translation* Anatole France, 1920 **Postcognitivist Beckett** Olga Beloborodova, 2020-06-04 The aim of this Element is to offer a reassessment of Beckett's alleged Cartesianism using the theoretical framework of extended cognition a cluster of present day philosophical theories that question the mind's brain bound nature and see cognition primarily as a process of interaction between the human brain and the environment it operates in The principal argument defended here is that despite the Cartesian bias introduced by early Beckett scholarship Beckett's fictional minds are not isolated skullscape Instead they are grounded in interaction with their fictional storyworlds however impoverished those may have become in the later part of his writing career *Early Miocene Paleobiology in Patagonia* Sergio F. Vizcaíno, Richard F. Kay, M. Susana Bargo, 2012-10-11 Coastal exposures of the Santa Cruz Formation in southern Patagonia have been a fertile ground for recovery of Early Miocene vertebrates for more than 100 years This volume presents a comprehensive compilation of

important mammalian groups which continue to thrive today It includes the most recent fossil finds as well as important new interpretations based on ten years of fieldwork by the authors A key focus is placed on the paleoclimate and paleoenvironment during the time of deposition in the Middle Miocene Climatic Optimum MMCO between twenty and fifteen million years ago The authors present the first reconstruction of what climatic conditions were like and present important new evidence of the geochronological age habits and community structures of fossil bird and mammal species Academic researchers and graduate students in paleontology paleobiology paleoecology stratigraphy climatology and geochronology will find this a valuable source of information about this fascinating geological formation Enacting Lecoq Maiya

Murphy,2018-12-30 This book examines the theatrical movement based pedagogy of Jacques Lecoq 1921 1999 through the lens of the cognitive scientific paradigm of enaction The conversation between these two both uncovers more of the possible cognitive processes at work in Lecoq pedagogy and proposes how Lecoq s own practical and philosophical approach could have something to offer the development of the enactive paradigm Understanding Lecoq pedagogy through enaction can shed new light on the ways that movement key to Lecoq s own articulation of his pedagogy might cognitively constitute the development of Lecoq s ultimate creative figure the actor creator Through an enactive lens the actor creator can be understood as not only a creative figure but also the manifestation of a fundamentally new mode of cognitive selfhood This book engages with Lecoq pedagogy s significant practices and principles including the relationship between the instructor and student identifications mime play mask work language improvisation and movement analysis The New Cambridge

Bibliography of English Literature: Volume 2, 1660-1800 George Watson,Ian R. Willison,1971-07-02 More than fifty specialists have contributed to this new edition of volume 2 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries *Routledge Library Editions: Alchemy* Various Authors,2021-03-05 Reissuing

seminal works originally published between 1916 and 1995 Routledge Library Editions Alchemy 7 volume set offers a selection of scholarship covering various facets of alchemical traditions Some texts examine alchemy itself while some offer insight into the motives for alchemical research and others outlay portraits of people such as Giordano Bruno and John Dee

MLN. ,1897 **Modern Language Notes** ,1897 **Routledge Library Editions: Artificial Intelligence**

Various,2021-06-23 Artificial Intelligence AI a term coined in the 1950s actually dates back as far as 1943 Now very much in the public consciousness AI research has fallen in and out of favour over the years Routledge Library Editions Artificial Intelligence 10 Volumes brings together as one set or individual volumes a small interdisciplinary series of previously out of

print titles originally published between 1970 and 1994 Covering ground in computer science literature philosophy psychology psychotherapy and sociology this set is a fascinating insight into the development of ideas surrounding AI
