Hurricane Manuel And Ingrid:

Sustainable Development Research and Practice in Mexico and Selected Latin American Countries Walter Leal Filho, Ricardo Noyola-Cherpitel, Pedro Medellín-Milán, Valeria Ruiz Vargas, 2017-11-27 This book provides an essential overview of sustainable development research in Mexico. It discusses the empirical research methods and findings as well as practical initiatives and projects being pursued in Mexico and other countries in the region. Although a number of Mexican universities are now conducting high quality research on matters related to sustainable development there are few publications that offer a multidisciplinary overview of research efforts for a broader audience. This book addresses that gap in the literature providing researchers at Mexican universities including those from other countries working in Mexico with an opportunity to present their work i.e. curriculum innovations, empirical work, activities, case studies and practical projects. As such it fosters the exchange of information, ideas and experiences, successful initiatives and best practices. **Of Rainfalls**

and Disasters Juan Manuel Rodríguez Esteves, Disasters associated with natural phenomena such as earthquakes, floods, droughts, etcetera, are intensifying damages that translate into deaths, the loss of infrastructure and the interruption of economic activities. The accelerated growth of cities frequently incorporates new areas that are susceptible to certain hazards, leaving society increasingly exposed due to a mismanagement of land. Since the 1990s the social sciences have developed the approach of vulnerability, which considers the conditions of weakness of a society to cope with hazards. We now know that risk is socially constructed and so disasters are not only a result of the intensity of the geophysical phenomena that unleash them but also of the contexts of vulnerability present when a phenomenon takes place. The aim of this work is to show how the risk of flood disasters is constructed in Tijuana, Baja California, with four main elements as our starting point: An examination of floods since the late 19th century; the voice of the actors present for flooding events; a theoretical model to understand the relationship between the hazard and the magnitude of the risk; and recommendations for disaster risk management at a local level. **Emergency and Disaster Management: Concepts, Methodologies, Tools, and Applications**

Management Association, Information Resources, 2018-07-06 In a world of earthquakes, tsunamis and terrorist attacks, emergency response plans are crucial to solving problems, overcoming challenges and restoring and improving communities that have been affected by these catastrophic events. Although the necessity for quick and efficient aid is understood, researchers and professionals continue to strive for the best practices and methodologies to properly handle such significant events. *Emergency and Disaster Management: Concepts, Methodologies, Tools, and Applications* is an innovative reference source for the latest research on the theoretical and practical components of initiating crisis management and emergency response. Highlighting a range of topics such as preparedness and assessment, aid and relief, and the integration of smart technologies, this multi-volume book is designed for emergency professionals, policy makers, practitioners, academicians and researchers interested in all aspects of disaster crisis and emergency studies. The Future of Disaster

Management in the U.S. Amy LePore, 2016-12-08 U S congressional debates over the last few years have highlighted a paradox although research demonstrates that emergencies are most effectively managed at the local level fiscal support and programmatic management in response to disasters has shifted to the federal level While the growing complexity of catastrophes may overwhelm local capacities and would seem to necessitate more federal engagement can a federal approach be sustainable and can it contribute to local capacity building This timely book examines local capacity building as well as the current legal policy and fiscal framework for disaster management questioning some of the fundamentals of the current system exploring whether accountability and responsibilities are correctly placed offering alternative models and taking stock of the current practices that reflect an effective use of resources in a complex emergency management system The Future of Disaster Management in the U S will be of interest to disaster and emergency managers as well as public servants and policy makers at all levels tasked with responding to increasingly complex catastrophes of all kinds *Disaster Upon Disaster* Susanna M. Hoffma, Roberto E. Barrios, 2019-10-03 A consistent problem that confronts disaster reduction is the disjunction between academic and expert knowledge and policies and practices of agencies mandated to deal with the concern Although a great deal of knowledge has been acquired regarding many aspects of disasters such as driving factors risk construction complexity of resettlement and importance of peoples culture very little has become protocol and procedure Disaster Upon Disaster illuminates the numerous disjunctions between the suppositions realities agendas and executions in the field goes on to detail contingencies predicaments old and new plights and finally advances solutions toward greatly improved outcomes *Crime Wars and Narco Terrorism in the Americas* Robert J. Bunker, 2014-07-16 This work marks the 3rd Small Wars Journal El Centro anthology Its analyses crafted by over thirty contributing authors forms a compilation of the violence and corruption in Mexico plaguing the first year of Enrique Pe a Nieto s presidency Instances of spillover violence in the United States and the gang and cartel crime wars in other Latin American countries are also chronicled Spanish language article appendices are additionally incorporated in this important anthology Dave Dilegge SWJ Editor in Chief **Fiscal Resilience to Natural Disasters Lessons from Country Experiences** OECD, The World Bank, 2019-05-20 This report presents the results of a study that compares country practices in the management of the financial implications of disasters on government finances for a set of OECD member countries and partner economies particularly exposed to natural hazards **A Blue Carbon Primer** Lisamarie Windham-Myers, Stephen Crooks, Tiffany G. Troxler, 2018-11-16 Key features Captures the historic context and recent developments in science and policy arenas that address the potential for coastal wetlands to be considered as significant contributors to carbon sequestration Links multiple levels of science biogeochemistry geomorphology paleoclimate etc with blue carbon concepts science policy mapping operationalization economics in a single compendium Concludes with a discussion of future directions which covers integrated scientific approaches impending threats and specific gaps in current knowledge Includes 7 case studies from across the globe that

demonstrate the benefits and challenges of blue carbon accounting Written by over 100 leading global blue carbon experts in science and policy Blue Carbon has emerged as a term that represents the distinctive carbon stocks and fluxes into or out of coastal wetlands such as marshes mangroves and seagrasses The Blue Carbon concept has rapidly developed in science literature and is highly relevant politically as nations and markets are developing blue carbon monitoring and management tools and policies This book is a comprehensive and current compendium of the state of the science the state of maps and mapping protocols and the state of policy incentives including economic valuation of blue carbon with additional sections on operationalizing blue carbon projects and 7 case studies with global relevance

Self-Defense in Mexico Luis Hernández Navarro, 2020-03-02 In Mexico and across other parts of Latin America local Indigenous peoples have built community policing groups as a means of protection where the state has limited control over and even complicity in crime and violence Luis Hernández Navarro a leading Mexican journalist offers a riveting investigation of these armed self defense groups that sprang up around the time of the 1994 Zapatista uprising in Chiapas Available in English for the first time the book spotlights the intense precarity of everyday life in parts of Mexico Hernández Navarro shows how the self defense response which now includes wealthier rancher and farmer groups is being transformed by Mexico's expanding role in the multibillion dollar global drug trade by foreign corporations extraction of raw minerals in traditionally Indigenous lands and by the resulting social changes in local communities But as Hernández Navarro acknowledges self defense is highly controversial Community policing may provide citizens with increased agency but for government officials it can be a dangerous threat to the status quo Leftists and liberals are wary of how the groups may be linked to paramilitary forces and vulnerable to manipulation by drug traffickers and the government alike This book answers the urgent call to understand the dangerous complexities of government failures and popular solutions

Management Engineering in Emerging Economies Guillermo Cortés-Robles, Eduardo Roldán-Reyes, Fernando Aguirre-y-Hernández, 2024-05-08 This book explores various technical domains including industrial engineering computer sciences process engineering and system engineering seamlessly integrated with management theories It explores how this fusion of knowledge can drive improvements transformations and the design of new processes products or organizational structures ultimately generating significant value for both society and the market The book introduces the concept of management engineering and delves into its implementation process including the development of new methodologies or frameworks designed to solve complex problems effectively It provides a comprehensive perspective on the evolution of management engineering presenting the most relevant strategies for assimilating this approach to generate value especially in the context of emerging economies
