Higher Education: Handbook of Theory and Research Michael B. Paulsen, 2016-04-12 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic The Handbook focuses on a comprehensive set of central areas of study in higher education that encompasses the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community Each annual volume contains chapters on such diverse topics as research on college students and faculty organization and administration curriculum and instruction policy diversity issues economics and finance history and philosophy community colleges advances in research methodology and more The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world

Responsibility and Resistance Tobias Eberwein, Matthias Karmasin, Friedrich Krotz, Matthias Rath, 2019-08-05 The volume deals with the normative challenges and the ethical questions imposed by and through the developments and changes in everyday life culture and society in the context of media change It is thus concerned with the questions of whether and how the central concept of enlightened ethics must evolve under these premises or in other words what form do ethics take in mediatized societies In order to address this question and to stimulate and initiate a debate the authors focus on two concepts responsibility and resistance Their contributions try to shed light not only on the empirical shreds of evidence of change in mediatized societies but also on the normative challenges and ethical possibilities of these developments

The Reformation in Economics Philip Pilkington, 2016-12-13 This book carves the beginnings of a new path in the arguably weary discipline of economics It combines a variety of perspectives from the history of ideas to epistemology in order to try to understand what has gone so wrong with economics and articulate a coherent way forward This is undertaken through a dual path of deconstruction and reconstruction Mainstream economics is broken down into many of its key component parts and the history of each of these parts is scrutinized closely When the flaws are thoroughly understood the author then begins the task of reconstruction What emerges is not a Grand Unified Theory of Everything but rather a provisional map outlining a new terrain for economists to explore The Reformation in Economics is written in a lively and engaging style that aims less at the formalization of dogma and more at the exploration of ideas This truly groundbreaking work invites readers to rethink their current understanding of economics as a discipline and is particularly relevant for those interested in economic pluralism and alternative economics

Energy In The 21st Century (3rd Edition) John R Fanchi,2013-03-26 Many events that affect global energy production and consumption have occurred since the second edition of Energy in the 21st Century appeared in 2011 For example an earthquake and tsunami in Japan led to the disruption of the Fukushima nuclear facility and a global re examination of the safety of the nuclear industry Oil and natural gas prices continue to be volatile and the demand for energy has been affected by the global economy The third edition updates data and the discussion of recent events Energy in the 21st Century has been used as the text for an introductory energy course for the general college student population Based on student feedback we have included several features that enhance the value of the third edition as a textbook In particular we have included learning objectives at the beginning of each chapter end of chapter activities a comprehensive index and a glossary Points to Ponder are abbreviated as P2P in the Learning Objectives boxes and are provided throughout the text They are designed to encourage the reader to consider the material from different perspectives **ALGORITHMIC HARM** CASS R.

SUNSTEIN,2025 Redistributing Happiness Hiroshi Ono,Kristen Schultz Lee,2016-08-29 Drawing on international comparisons of data on happiness this book offers both general and academic audiences a simple deep and honest answer to the timeless question What makes people happy The conventional recipe for happiness has long included money marriage and parenthood as basic ingredients What research is telling us however is that these elements don t relate to happiness in quite the way we might expect them to Redistributing Happiness How Social Policies Shape Life Satisfaction explores the factors that determine life satisfaction and demonstrate how an individual s happiness is largely shaped by social context by where they live and local policies norms and attitudes about religious beliefs economic and political security income

redistribution and more The book begins with a review of the contributions of other disciplines such as economics psychology and political science to common explanations of the sources of happiness Next the authors offer an international comparison based on their own research on what makes people happy taking into consideration factors such as marriage children money and job status Most importantly special attention is paid to how social policies and social context directly affect people s happiness All readers high school age and up will enjoy the book s comprehensive and fascinating answer to the happiness question because of how the authors connect an individual s experience to the broader environment of the social system and situation in which that person resides **Feedback Economics** Robert Y. Cavana,Brian C. Dangerfield,Oleg V.

Pavlov,Michael J. Radzicki,I. David Wheat,2021-06-30 This book approaches economic problems from a systems thinking and feedback perspective By introducing system dynamics methods including qualitative and quantitative techniques and computer simulation models the respective contributions apply feedback analysis and dynamic simulation modeling to important local national and global economics issues and concerns Topics covered include an introduction to macro modeling using a system dynamics framework a system dynamics translation of the Phillips machine a re examination of classical economic theories from a feedback perspective analyses of important social ecological and resource issues the development of a biophysical economics module for global modelling contributions to monetary and financial economics analyses of macroeconomic growth income distribution and alternative theories of well being and a re examination of scenario macro modeling The contributions also examine the philosophical differences between the economics and system dynamics communities in an effort to bridge existing gaps and compare methods Many models and other supporting information are provided as online supplementary files Consequently the book appeals to students and scholars in economics as well as to practitioners and policy analysts interested in using systems thinking and system dynamics modeling to understand and improve economic systems around the world Clearly there is much space for more collaboration between the advocates of post Keynesian economics and system dynamics More generally I would like to recommend this book to all scholars and practitioners interested in exploring the interface and synergies between economics system dynamics and feedback thinking Comments in the Foreword by Marc Lavoie Emeritus Professor University of Ottawa and University of Sorbonne Paris Nord

Judgement-Proof Robots and Artificial Intelligence Mitja Kovač,2020-09-03 This book addresses the role of public policy in regulating the autonomous artificial intelligence and related civil liability for damage caused by the robots and any form of artificial intelligence It is a very timely book focusing on the consequences of judgment proofness of autonomous decision making on tort law risk and safety regulation and the incentives stemming from these This book is extremely important as regulatory endeavours concerning AI are in their infancy at most whereas the industry s development is continuing in a strong way It is an important scientific contribution that will bring scientific objectivity to a to date very one sided academic treatment of legal scholarship on AI **Demand for Private Supplementary Tutoring in China** Junyan

Liu,2023-05-29 This book combines the ideologies of parentocracy and consumer theory as theoretical lenses to view the private supplementary tutoring also known as shadow education with a focus on the demand at primary and lower secondary levels in China It first explains parents motivations of seeking private tutoring and their decision making dynamics and then explores the evolving micro level process of demand that has changed over time It further investigates how demand for private tutoring varies across parental socioeconomic status This book also discusses parents attitudes towards the Double Reduction policy and corresponding changes in their demand for tutoring It concludes with some implications for regulating private tutoring and for improving school education This book has pertinence in other countries as well as in China Unpacking the demand for tutoring improves understanding of the global expansion and changing shapes of the phenomenon Researchers educational policy makers teachers tutors consultants and other educational practitioners interested in the topic of private tutoring will find this work thought provoking instructive and informative *Entrepreneurship and Management in Forestry and Wood Processing* Franz Schmithüsen,Bastian Kaiser,Albin Schmidhauser,Stephan Mellinghoff,Karoline Perchthaler,Alfred W. Kammerhofer,2015-05-08 Forestry has long been in a rather favourable position in offering a valuable raw material source in high demand However with rapidly changing end user demands and cost competitiveness within the forest and wood chain as a whole the industry is needing to adapt Explaining entrepreneurial action as part of a chain of comprehensive value added processes leads to a new perception of forest production and wood processing This book applies the main concepts of modern managerial science to the world of forestry and is the perfect book for students studying forestry and wood processing as well as entrepreneurs and managers within the sector Topics are covered from an entrepreneurial perspective and include perspectives from accounting finance economics supply chain management marketing and strategy *Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic* Erokhin, Vasilii,Gao, Tianming,Zhang, Xiuhua,2018-12-28 Global interest in the exploration of the Arctic has been growing rapidly As the Arctic becomes a global resource base and trade corridor between the continents it is crucial to identify the dangers that such a boom of extractive industries and transport routes may bring on the people and the environment The Handbook of Research on International Collaboration Economic Development and Sustainability in the Arctic discusses the perspectives and major challenges of the investment collaboration and development and commercial use of trade routes in the Arctic Featuring research on topics such as agricultural production environmental resources and investment collaboration this book is ideally designed for policymakers business leaders and environmental researchers seeking coverage on new practices and solutions in the sphere of achieving sustainability in economic exploration of the Arctic region Narrative Factuality Monika Fludernik,Marie-Laure Ryan,2019-12-16 The study of narrative the object of the rapidly growing discipline of narratology has been traditionally concerned with the fictional narratives of literature such as novels or short stories But narrative is a transdisciplinary and transmedial concept whose manifestations encompass both the

fictional and the factual In this volume which provides a companion piece to Tobias Klauk and Tilmann Kppe s *Fiktionalit t Ein interdisziplin res Handbuch* the use of narrative to convey true and reliable information is systematically explored across media cultures and disciplines as well as in its narratological stylistic philosophical and rhetorical dimensions At a time when the notion of truth has come under attack it is imperative to reaffirm the commitment to facts of certain types of narrative and to examine critically the foundations of this commitment But because it takes a background for a figure to emerge clearly this book will also explore nonfactual types of narratives thereby providing insights into the nature of narrative fiction that could not be reached from the narrowly literary perspective of early narratology Innovation in Real Places Dan

Breznitz, 2021-03-09 Winner of Balsillie Prize for Public Policy Winner of Donner Prize A challenge to prevailing ideas about innovation and a guide to identifying the best growth strategy for your community Across the world cities and regions have wasted trillions of dollars on blindly copying the Silicon Valley model of growth creation Since the early years of the information age we ve been told that economic growth derives from harnessing technological innovation To do this places must create good education systems partner with local research universities and attract innovative hi tech firms We have lived with this system for decades and the result is clear a small number of regions and cities at the top of the high tech industry but many more fighting a losing battle to retain economic dynamism But are there other models that don t rely on a flourishing high tech industry In *Innovation in Real Places* Dan Breznitz argues that there are The purveyors of the dominant ideas on innovation have a feeble understanding of the big picture on global production and innovation They conflate innovation with invention and suffer from techno fetishism In their devotion to start ups they refuse to admit that the real obstacle to growth for most cities is the overwhelming power of the real hubs which siphon up vast amounts of talent and money Communities waste time money and energy pursuing this road to nowhere Breznitz proposes that communities instead focus on where they fit in the four stages in the global production process Some are at the highest end and that is where the Clevelands Sheffields and Baltimores are being pushed toward But that is bad advice Success lies in understanding the changed structure of the global system of production and then using those insights to enable communities to recognize their own advantages which in turn allows to them to foster surprising forms of specialized innovation As he stresses all localities have certain advantages relative to at least one stage of the global production process and the trick is in recognizing it Leaders might think the answer lies in high tech or high end manufacturing but more often than not they re wrong *Innovation in Real Places* is an essential corrective to a mythology of innovation and growth that too many places have bought into in recent years Best of all it has the potential to prod local leaders into pursuing realistic and regionally appropriate models for growth and innovation *Agricultural Product Prices* William G. Tomek, Harry M. Kaiser, 2014-05-08 Published continuously since 1972 *Agricultural Product Prices* has become the standard textbook and reference work for students in agricultural and applied economics buyers and sellers of commodities and policymakers clearly explaining

conceptual and empirical models applicable to agricultural product markets The new fifth edition uses up to date information and models to explain the behavior of agricultural product prices Topics include price differences over market levels marketing margins price differences over space regionally and internationally and by quality attributes and price variability with the passage of time seasonal and cyclical variations trends and random behavior William G Tomek and Harry M Kaiser review and adapt microeconomic principles to the characteristics of agricultural commodity markets and then apply these principles to the various dimensions of price behavior They also provide an in depth discussion of prices established for futures contracts and their relationship to cash spot market prices cover the influential roles of price discovery institutions such as auctions and negotiated contracts and government policies regulating trade and farms and discuss the specification use and evaluation of empirical models of agricultural prices placing emphasis on the challenges of doing high quality useful analyses and interpreting results
