China s role as an economic powerhouse in Latin America is reshaping a region on the cusp of development and change Since the turn of the century bilateral trade between China and Latin America has increased massively going from 12 17 billion in 2000 to 307 94 billion in 2019 From the pampas of Argentina and the vast Brazilian Amazon to Panama s canal and Jamaica s coastal waters China is financing roads railways dams and ports that are transforming regional economies and societies Beyond China s global search for resources and markets Beijing s engagement with Latin America is amplified by cutting edge technologies and a growing assertiveness in regional diplomatic and military affairs The United States once complacent in its dominant position over its proverbial backyard is increasingly alarmed by the spectacle of deepening Chinese involvement in this part of the Western hemisphere What are we to make of these shifting dynamics In this detailed and up to the minute investigation Chris Alden author of the critically acclaimed China in Africa and Alvaro Mendez leading expert in the international relations of Latin America look at the interests strategies and practices of China s incoming power The book starts by unpacking the historical links between Imperial China and Colonial Latin America through the 19th century then turns to the revolutionary role played by Mao s China during the Cold War Next it turns to global China s contemporary expansion into Latin America by focusing on the development dimensions of engagement in individual countries and concurrently on the exercise of agency by Latin American governments and societies intent on managing Chinese interests to their advantage Finally the book addresses these relationships in the context of heightened global competition between China and the United States which in Latin America manifests as sharpened contestation over everything from investment in lithium mining to the promotion of Covid vaccines
