1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. **Identify the problem.** The first step is to identify the problem or issue that needs to be addressed. This involves understanding the context, the stakeholders involved, and the specific goals and objectives of the project.
2. **Analyze the problem.** Once the problem is identified, the next step is to analyze it. This involves breaking down the problem into smaller, more manageable components and identifying the root causes of the problem.
3. **Generate solutions.** The third step is to generate potential solutions to the problem. This involves brainstorming ideas and evaluating them based on their feasibility, effectiveness, and potential impact.
4. **Select a solution.** Once a solution has been identified, the next step is to select the best solution. This involves comparing the different solutions and choosing the one that best meets the project's goals and objectives.
5. **Implement the solution.** The final step is to implement the selected solution. This involves developing a plan of action, allocating resources, and executing the plan.
