Military Intake 2014:

China's Military Power Roger Cliff, 2015-09-15 Once termed the world's largest military museum the Chinese military has made enormous progress over the past twenty years. With skyrocketing military budgets and new technology, China's tanks, aircraft, destroyers, and missile capabilities are becoming comparable to those of the United States. If these trends continue, how powerful will the Chinese military be in the future? Will its capabilities soon rival or surpass those of the United States? The most comprehensive study of its kind, this book provides a detailed assessment of China's military capabilities in 2000 and 2010, with projections for 2020. It is the first of its kind in outlining a rigorous, theoretically and empirically grounded framework for assessing military capability based on not just weaponry but also doctrine, training, equipment, and organizational structure. This framework provides not only the most accurate assessment of China's military to date but an important new tool in the study of military history.

Advances in the Assessment of Dietary Intake. Dale A. Schoeller, M. Westerterp, 2017-08-15 Diet is a major factor in health and disease. Controlled long-term studies in humans are impractical, and investigators have utilized long-term epidemiological investigations to study the contributions of diet to the human condition. Such studies, while valuable, have often been limited by contradictory findings, a limitation secondary to systematic errors in traditional self-reported dietary

assessment tools that limit the percentage of variances in diseases explained by diet New approaches are available to help overcome these limitations and *Advances in the Assessment of Dietary Intake* is focused on these advances in an effort to provide more accurate dietary data to understand human health Chapters cover the benefits and limitations of traditional self report tools strategies for improving the validity of dietary recall and food recording methods objective methods to assess food and nutrient intake assessment of timing and meal patterns using glucose sensors and physical activity patterns using validated accelerometers *Advances in the Assessment of Dietary Intake* describes new avenues to investigate the role of diet in human health and serves as the most up to date reference and teaching tool for these methods that will improve the accuracy of dietary assessment and lay the ground work for future studies *Propaganda and Public Relations in Military Recruitment* Brendan Maartens, Thomas Bivins, 2020-11-19 This book represents the first international investigation of military recruitment advertising public relations and propaganda Comprised of eleven case studies that explore mobilisation work in Africa the Americas Asia and Europe it covers more than a hundred years of recent history with chapters on the First and Second World Wars the Cold War and the present day The book explores such promotion in countries both large and small and in times of both war and peace with readers gaining an insight into the different strategies and tactics used to motivate men women and occasionally even children to serve and fight in many parts of the world Readers will also learn about the crucial but little known role of commercial advertising public relations and media professionals in the production and distribution of recruitment promotion This book the first of its kind to be published will explore that role and in the process address two questions that are central to studies of media and conflict how do militaries encourage civilians to join up and are they successful in doing so It is a multi disciplinary project intended for a diverse academic audience including postgraduate students exploring aspects of war propaganda and public opinion and researchers working across the domains of history communications studies conflict studies psychology and philosophy *America's Digital Army* Robertson Allen, 2017-07-01 An ethnographic study based on scholar Robertson Allen s years of behind the scenes ethnographic fieldwork within the work environments of the video game developers military strategists enlisted soldiers and defense contractors who produced the official U S Army video game *America s Army* *Domesticating Geopolitics* Sean Carter, Tara Woodyer, 2023-09-26 This book explores the ways in which the study of the domestic and the international far from being separate spheres are in fact woven together in multiple ways The chapters in this volume seek to question this traditional domestic international binary and approach their entanglement through a range of different empirical settings and methodological approaches Inspired by a recent turn towards recognising the importance of the home the intimate and the everyday in the construction of geopolitical worlds this book captures a broad range of agents practices objects performativities and discourses that contribute to how geopolitics is rendered familiar sanitised embodied and enacted and the ways in which the home and the traditional terrain of the geopolitical the international sphere are in fact folded into each

other in multiple ways Domesticating Geopolitics will be of great use to students and researchers interested in geography and politics including popular geopolitics and human geography This book was originally published as a special issue of Geopolitics
