Threading the film

Having trained your P 8 *m* on the screen to the correct height, you can switch the projector off, of course. This is as easy as the film track is well marked and easily accessible.

Put the feed spool on the front arm, turning down the spring tongue, 18 inches of film. You will no doubt hook on to the film. For normal operation it doesn't matter whether the film unwinds from the feed spool clockwise or anti-clockwise. The only important thing is that the perforations are on the right side of the screen from behind the projector. Care has been run through the projector otherwise you will project the whole film. Now open the gate by turning lever A the film (see Fig. 8), and close the lever back. Please do not put the film completely over to the right — this is for the rewind mechanism.

Fig. 9 shows how the film is led past the gate after forming the loop indicated on
