Negotiation of Contingent Talk Emi Morita, 2005-08-25 Observing naturally occurring talk in interaction in Japanese this book examines how Japanese speakers segment their talk into relevant interactional units and use particles such as ne and sa to accomplish local pragmatic work The study provides a conversation analytic action oriented account for the ubiquity of such particles in Japanese talk The study argues that such particles are important resources for Japanese speakers to negotiate and fine tune particular conversational contingencies within the emerging sequential environment of the talk Various examples show that prospective alignment and the negotiability of conversational next action are ever present issues for Japanese conversationalists and are handled at the precise moment of their relevance through interlocutors deployment of ne and sa This study thus adds to the literature on Japanese conversational interaction a novel understanding of particle use in its synthesis of functional linguistics and conversation analysis

Second Language Acquisition Processes in the Classroom Amy Snyder Ohta, 2001 This book is the first study to examine how interactional style develops within the walls of a foreign language classroom in the first two years of language study Results show learners to be highly sensitive to pragmatic information and that learners can move toward an appropriate interactional style through classroom interactive experience The book shows how learners are most often sources who offer assistance and correction with errors serving most often to stimulate further thinking about what form is correct Analysis shows learners to be active in seeking corrective information in the classroom setting not only from peer partners but also from the teacher They are active in noticing how the teacher's utterances even when addressed to others contrast with their own and utilize corrective feedback intended for other students In addition the results show that teacher initiated corrective feedback addressed to individual learners is only one source of corrective feedback Learners are shown to be active in both teacher fronted and peer interactive settings In newer L2 teaching methodologies which focus on the use of peer interactive tasks the teacher's role has been de emphasized This book however shows how important the teacher's

role is The final chapter examines how the teacher can act to maximize the benefits of peer interactive tasks through how they design tasks and present them to the class First the chapter looks at how learners use English their L1 in the classroom concluding that how teachers present activities to the class has an impact on the amount of L1 used by students during peer interaction Following up on this finding the chapter works to address questions that teachers face in lesson planning and teaching It presents a useful list of questions teachers can ask when designing peer interactive tasks in order to maximize the effectiveness of a wide variety of language learning tasks Rewards in the Afterlife Marcus E.
