The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. *Community Data* Rahul Bhargava, 2024-11-04 Community Data offers a new toolkit for data storytelling in community settings, one purpose-built for goals like inclusion, empowerment, and impact. Data science and visualization has spread into new domains; it was designed for community organizing, education, journalism, civic governance, and more. The dominant computational methods and processes, which have not changed in response, are causing significant discriminatory and harmful impacts, documented by leading scholars across a variety of populations. Informed by 15 years of collaborations in academic and professional settings with nonprofits and marginalized populations, the book articulates a new approach for aligning the processes and media of data work with social good outcomes, learning from the practices of newspapers, museums, community groups, artists, and libraries. This book introduces a community-driven framework as a response to the urgent need to realign data theories and methods around justice and empowerment, to avoid further replicating harmful power dynamics, and ensure everyone has a seat at the table in data-centered community processes. It offers a broader toolbox for working with data and presenting it, pushing beyond the limited vocabulary of surveys, spreadsheets, charts, and graphs. **Resources in Education**, 1974 **Reference Guides that Should be Known and how to Use Them** Florence May Hopkins, 1919 **Reference Guides that Should be Known and how to Use Them: Year-books** Florence May Hopkins, 1919
